Shade selection

Chromascop® shade guide

The Chromascop® shade guide is used to select tooth shades according to the Chromascop shade system.

The 20 shades are divided into five clearly arranged shade groups.

Delivery forms

Chromascop shade guide	1x	529479
------------------------	----	--------

A-D shade guide with Bleach shades

The A-D shade guide is an instrument for the selection of tooth shades according to the A-D and Bleach shade system.

The 16 basic shades in the shade groups A, B, C and D, supplemented by the 4 modern Bleach shades BL 1 to BL 4, are practical to use and represent the ideal tool for dentists and dental technicians.

Teeth

SR Phonares II shade guide

The layering, material and shade of the shade guide tabs correspond with those of the SR Phonares II teeth. This enables clinicians to exactly determine the shade for the removable denture prosthetics fabricated with SR Phonares II, available in 16 A–D and 4 Bleach shades.

The shade guide includes an integrated facial meter and papillameter to easily determine the tooth size. The facial meter is used to measure the interalar width of the nose and select the appropriate tooth size. The papillameter is the ideal device for the definition of the length of the upper lip and the lip closure line.

This shade guide is suitable to determine the shade of:

- ✓ SR Phonares II
- ✓ SR Phonares II Typ
- ✓ SR Phonares II Lingual

Delivery forms

SR Phonares II shade guide	1x	640738
----------------------------	----	--------

SR Phonares II

SR Phonares II is a four-layer tooth for highly esthetic removable denture prosthetics that matches the age and type of the patient. As they are fabricated from a filled hybrid composite of the latest generation, these teeth are especially suitable for use in exacting partial and complete denture prosthetics, including implant-supported applications.

Delivery forms

SR Phonares II anterior teeth		
16 A–D, 4 Bleach shades	6 teeth per set	639350
18 upper, 6 lower		

SR Phonares II Typ

SR Phonares II Typ teeth are made of the same filled hybrid composite of the latest generation as the anterior teeth. The semi-anatomical mould is designed for the conventional set-up method.

Delivery forms

SR Phonares II Typ posterior teeth		
16 A–D, 4 Bleach shades	8 teeth per set	639352
3 upper, 3 lower		

SR Phonares II Lingual

SR Phonares II Lingual teeth are made of the same filled hybrid composite of the latest generation as the anterior teeth. The mould is designed for the lingualized set-up method.

Delivery forms

SR Phonares II Lingual posterior teeth			
16 A-D, 4 Bleach shades	8 teeth per set	639351	
3 upper, 3 lower			

Living tooth mould chart SR Phonares II

These living tooth mould charts contain tooth lines in one shade. They are the ideal tool for direct tooth selection – with the patient, but also in the laboratory. All available moulds are clearly arranged according to groups.

The set-up models show three different anterior tooth arrangements for customer consultation.

Delivery forms

Posterior Typ and Lingual	1x	641069	

SR Vivodent® S PE shade guide

The SR Vivodent S PE shade guide enables the operator to determine the tooth shade according to the Ivoclar PE shade system.

The shade guide includes an integrated facial meter and papillameter to easily determine the tooth size. The facial meter is used to measure the interalar width of the nose and select the appropriate tooth size. The papillameter is the ideal device for the definition of the length of the upper lip and the lip closure line.

Delivery forms

SR Vivodent® S PE shade guide	1x	662637
-------------------------------	----	--------

SR Vivodent® S PE

Nature creates the most beautiful tooth shapes and shades and these have guided the design of the SR Vivodent® S PE tooth line. Esthetically and prosthetically optimized, the tooth line is designed to meet the individual requirements of today's and tomorrow's patients.

Delivery forms

SR Vivodent® S PE anterior teeth		
20 PE shades	6 teeth per set	656552
16 upper, 8 lower		

SR Orthotyp® S PE

The Orthotyp posterior tooth moulds have been developed on the basis of a detailed functional analysis of the stomatognathic system. The modern appearance meets high prosthetic and esthetic demands. In line with the principle of group function, the Orthotyp posterior moulds are set up in a tooth-to-two-tooth relationship.

Delivery forms

SR Orthotyp® S PE posterior teeth		
20 PE shades	8 teeth per set	657193
4 upper, 4 lower		

Living tooth mould chart SR Vivodent® S PE

The tooth mould chart contains all the tools necessary for a quick and systematic selection of denture teeth. It includes a shade guide with an integrated facial meter and papillameter as well as all the tooth moulds available. Anterior teeth are arranged according to size and tooth mould. Posterior teeth are assigned to the respective sizes S, M and L.

Delivery forms

SR Vivodent® S DCL shade guide

The SR Vivodent S DCL shade guide enables the operator to determine the tooth shade according to the A–D or Bleach shade system. The shade guide includes an integrated facial meter and papillameter to easily determine the tooth size. The facial meter is used to measure the interalar width of the nose and select the appropriate tooth size. The Papillameter is the ideal device for the definition of the length of the upper lip and the lip closure line.

Nature creates the most beautiful tooth shapes and shades and these have guided the design of this tooth line. Esthetically and prosthetically optimized, the tooth line is designed to meet the individual requirements of today's and tomorrow's patients.

Delivery forms

SR Vivodent® S DCL anterior teeth		
16 A–D shades, 4 Bleach shades	6 teeth per set	683394
16 upper, 8 lower		

SR Orthotyp® S DCL

The SR Orthotyp posterior moulds have been designed on the basis of a detailed functional analysis of the stomatognathic system. The modern appearance meets high prosthetic and esthetic demands. In line with the principle of group function, the Orthotyp posterior moulds are set up in a tooth-to-two-tooth relationship.

Delivery forms

SR Orthotyp® S DCL posterior teeth		
16 A–D shades, 4 Bleach shades	8 teeth per set	683795
4 upper, 4 lower		

SR Ortholingual S DCL

Due to a static orientation, SR Ortholingual S DCL is especially suitable for implant-supported removable restorations. The teeth are set up in a tooth-to-tooth relationship. They are also suitable for being set up in a tooth-to-two-tooth relationship.

Delivery forms

SR Ortholingual S DCL posterior teeth

16 A–D shades, 4 Bleach shades 3 upper, 3 lower	8 teeth per set	693636
--	-----------------	--------

Living tooth mould chart SR Vivodent® S DCL

The tooth mould chart contains all the tools necessary for a quick and systematic selection of denture teeth. It includes a shade guide with an integrated facial meter and papillameter as well as all the tooth moulds available. Anterior teeth are arranged according to size and tooth mould. Posterior teeth are assigned to the respective sizes S, M and L.

SR Vivodent S DCL / SR Orthotyp S DCL SR Ortholingual S DCL	1x	702353

SR Vivodent DCL shade guide

The three layers of original DCL material impart a lifelike esthetic appearance to the shade samples of the shade guide. The shade guide with 16 A–D and 4 Bleach shades is suitable for the shade selection of:

- ✓ SR Vivodent DCL
- ✓ SR Vivodent Plus DCL
- ✓ SR Orthotyp DCL
- ✓ SR Ortholingual DCL
- ✓ SR Orthoplane DCL

Delivery forms

SR Vivodent DCL shade guide	1x	613331
-----------------------------	----	--------

SR Vivodent DCL SR Vivodent Plus DCL

The SR Vivodent anterior tooth line, made of DCL (double-cross linked) material, offers 24 upper and 8 lower anterior A moulds in excellent esthetic quality.

The SR Vivodent Plus DCL tooth line comprises the 18 most popular tooth moulds on the North American market.

Delivery forms

SR Vivodent DCL anterior teeth			
16 A–D shades, 4 Bleach shades	6 teeth per set	564852	
24 upper, 8 lower			

SR Vivodent Plus DCL anterior teeth			
16 A–D shades, 4 Bleach shades	6 teeth per set	591300	
18 upper			

SR Orthotyp DCL

Previously well known as the ideal supplement to the SR Vivodent anterior tooth line, the SR Orthotyp DCL tooth line has been optimized by the use of DCL (double cross-linked) material. The teeth are available in 5 upper and 5 lower posterior tooth moulds.

Delivery forms

SR Orthotyp DCL posterior teeth			
16 A–D shades, 4 Bleach shades	8 teeth per set	565587	
5 upper, 5 lower			

SR Ortholingual DCL

The SR Ortholingual DCL posterior tooth in 3 upper and 3 lower moulds combines esthetics and functional occlusion with an excellent abrasion behaviour. SR Ortholingual DCL teeth are set up according to an easy and functional scheme that is particularly favourable for the lingualized set-up method.

Delivery forms

SR Ortholingual DCL posterior teeth		
16 A-D shades, 4 Bleach shades 3 upper, 3 lower	8 teeth per set	565733

SR Orthoplane DCL

SR Orthoplane DCL is the 0° posterior tooth available in 3 upper and 3 lower moulds. Its most important feature is its simple occlusal anatomy combined with excellent material quality.

Delivery forms

SR Orthoplane DCL posterior teeth		
16 A-D shades, 4 Bleach shades 3 upper, 3 lower	8 teeth per set	565843

Living tooth mould chart SR Vivodent DCL

These living tooth mould charts contain tooth sets in one shade. They are the ideal tool for direct tooth selection – with the patient, but also in the laboratory. All available moulds are arranged according to groups.

Delivery forms

--	----------	--------

SR Vivodent A-D shade guide

The SR Vivodent A-D shade guide enables the operator to determine the tooth shade according to the A-D or Bleach shade system. The shade tabs are made of the original SR Vivodent tooth material and are correspondingly layered.

Delivery forms

SR Vivodent A-D shade guide	1x	748118
-----------------------------	----	--------

SR Vivodent

The natural appearance and the excellent chemical properties are decisive features of the SR Vivodent anterior teeth made of PMMA. The large selection of 20 upper and 8 lower A moulds is based on the tried-and-tested, anatomical Ivoclar anterior tooth moulds.

Delivery forms

SR Vivodent anterior teeth		
20 upper, 8 lower		
Chromascop shades	6 teeth per set	540260
A-D and Bleach shades	6 teeth per set	747446

SR Orthotyp

The 5 upper and 5 lower N moulds of the SR Orthotyp posterior teeth made of PMMA are the ideal supplement for the SR Vivodent anterior teeth. The moulds are based on the proven Orthotyp principle.

Delivery forms

SR Orthotyp posterior teeth		
5 upper, 5 lower		
Chromascop shades	8 teeth per set	540050
A-D and Bleach shades	8 teeth per set	747447

Living tooth mould chart SR Vivodent A-D

The living tooth mould chart contains all tooth moulds of the SR Vivodent and SR Orthotyp tooth lines in the shade A2 as well as the SR Vivodent A-D shade guide.

Delivery forms

Ivostar® / Gnathostar® shade guide

The Ivostar / Gnathostar shade guide enables the operator to determine the tooth shade according to the A-D or Bleach shade system. The shade tabs are made of the original Ivostar anterior tooth material and are correspondingly layered.

Delivery forms

Ivostar® / Gnathostar® shade guide	1x	626888
------------------------------------	----	--------

Ivostar®

The attractive and versatile Ivostar anterior teeth are composed of three layers. They are made of high-quality PMMA, and they are available in esthetic Chromascop, A-D and Bleach shades.

Delivery forms

Ivostar® anterior teeth

20 Chromascop, 16 A-D shades, 4 Bleach shades
15 upper, 6 lower

Chromascop shades	6 teeth per set	517213
A-D and Bleach shades	6 teeth per set	576694

Gnathostar®

The Gnathostar posterior teeth are composed of two layers and made of PMMA. The material, layering and shade are optimally matched to the Ivostar anterior teeth.

Delivery forms

Gnathostar® posterior teeth

20 Chromascop, 16 A-D shades, 4 Bleach shades
5 upper, 5 lower

Chromascop shades	8 teeth per set	517019
A-D and Bleach shades	8 teeth per set	576695

Tooth Cabinet SR Phonares

An anthracite grey version of the tried-and-tested Ivoclar Tooth Cabinet was created especially for the SR Phonares® II tooth line. The four drawers offer room for 180 anterior and 120 posterior tooth sets. Conveniently, the cabinet can be used also for other Ivoclar tooth sets, as the inserts are identical.

Delivery forms

Tooth Cabinet SR Phonares II

Tooth Cabinets

The elegant, practical design of the Ivoclar tooth cabinets speaks for itself. The stackable cabinets are available in three sizes and the drawers can be filled with sets of anterior and posterior teeth. Suitable for all Ivoclar anterior and posterior tooth moulds.

The following sizes are available:

- ✓ Z4 = 4 drawers
- ✓ Z6 = 6 drawers
- ✓ Z12 = 12 drawers

One drawer can hold the following items:

- ✓ 90 sets x 6 = 540 anterior teeth
- ✓ 60 sets x 8 = 480 posterior teeth

Prosthetics

Materials

IvoBase® High Impact

IvoBase High Impact combines the qualitative advantages of a heat-curing polymer with the processing features of a self-curing polymer and thus creates a new category of denture base resins. The PMMA-based material is processed in the IvoBase Injector.*

The impact-resistant and fracture-proof material offers an excellent occlusal fit due to shrinkage compensation.

IvoBase® High Impact is available in predosed capsules.

Shades:

Pink; Pink-V; Preference

With enhanced opacity: Pink-V Implant; Preference Implant; 34-V

* Residual monomer reduction function of the IvoBase Injector

Centric Tray	1x	
Regular supports	3x	
Supporting wings	3x	

Prosthetic equipment

Processing equipment

IvoBase® Injector

IvoBase® Injector is a compact plug&play device used without water bath. It permits a fully automated, controlled injection and polymerization procedure for PMMA resins which are coordinated with the system. The chemical polymerization shrinkage of the resin is entirely compensated during polymerization – thanks to the patented temperature control in the flask and the heater. This enables the fabrication of denture bases featuring high accuracy of fit and precision. The injector has been especially developed for the IvoBase material and permits excellent restorations with a low residual monomer content.

The IvoBase Injector can also be used for the tried-and-tested Ivocap material.

An Optical Status Display (OSD) informs the user about the current operating status.

Technical data

Voltage	110 – 240 V
Nominal frequency	50 – 60 Hz
Acceptable voltage fluctuations	+/- 10 %
Dimensions	Depth: 400 mm Width: 340 mm Height: 560 mm
Weight	35.6 kg

Articulators

Stratos® 100

The Stratos 100 with the centric locking catch is a biofunctional average-value articulator for various simple dental reconstructions. Its ergonomic design with a separable upper and lower frame and spacious column construction enables easy and efficient handling. The Stratos 100 is the ideal articulator to set up Ivoclar teeth according to the Biofunctional Prosthetic System (BPS®).

Delivery forms

Stratos® 100	576820
Stratos 100	1x
Incisal plate 0°	1x
Incisal indicator	1x
Retentive base blocks	2x
Plaster protection plate	1x
Incline support	1x
Protrusion screws	2x
Bennett inserts	2x

Stratos® 200

The Stratos 200 with the centric locking catch is a biofunctional articulator which is universally applicable due to its various options. Its ergonomic design with a separable upper and lower frame and spacious column construction enables easy and efficient handling. Standard equipment contains additional 30° or 15° protrusion inserts for fixed or swivel axis, 30° Bennett inserts, and a 0° incisal plate, as well as an incline support.

Delivery forms

Stratos® 200	536381
Stratos 200	1x

Plaster protection plate	1x
Incline support	1x

Stratos® 300

The Stratos 300 with the centric locking catch is a biofunctional, individually adjustable articulator. All the joint angles can be continuously set without having to replace any elements. The Stratos 300 is suitable for demanding restorations for which the joint angles have to be individually set. Its ergonomic design with a separable upper and lower frame and spacious column construction enables easy and efficient handling.

Delivery forms

Accessories for articulators

Accessories assortment "personalized" (for Stratos® 200)

A) Instrument carrier

Holding device for bite fork support

E) Plane indicator

Indicates the reference planes of the Stratos 200 during individual model orientation.

F) Bite fork support

Holds the bite fork of the transferbow and avoids the lowering of the bite fork during model orientation in the Stratos 200.

G) CE registration joint holder

This accessory eliminates the need to send the complete transferbow to the dental laboratory. The laboratory needs only the registration joint for the model transfer into the Stratos 200.

H) Incisal plates

15°, 30°, 0° individual

K) Joint inserts assortment

Protrusion inserts: 15°, 20°, 25°, 35°, 40°, 45°, 60°
Bennett inserts: 15°

Delivery forms

Accessories assortment "personalized" (for Stratos 200)	536383
Instrument carrier	1x
Plane indicator	1x
Bite fork support	1x
CE registration joint holder	1x
Incisal plate 15°, 30°	1 x each
Incisal plate for personalized anterior guidance	1x
Joint inserts assortment:	
Protrusion inserts: 15°, 20°, 25°, 35°, 40°, 45°, 60°	2 x each
Bennett inserts: 15°	2x

Joint inserts (for Stratos® 200)

Delivery forms

Accessories assortment "average value" (for Stratos® 100, 200, 300)

A) Instrument carrier

Holding device for horizontal guide, set-up table, 2D setting-up template, and bite fork support.

B) Horizontal guide

Permits orientation of dentulous and edentulous models according to the Bonwill triangle.

C) 2D setting-up template

For correct set-up according to average values, taking the Spee and Wilson curves into consideration.

D) Setup table

Permits easy average-value orientation of dentulous models according to the Bonwill triangle.

Delivery forms

Accessories assortment "average value" (for Stratos 100, 300)	536382
Instrument carrier	1x
Horizontal guide	1x

Stratos® case	1x	583673
---------------	----	--------

Registration devices

UTS 3D universal transferbow system

This system permits skull/joint-related orientation of models into the Stratos articulators according to patients' individual data. The UTS 3D transferbow is adjustable according to the Frankfort Horizontal (FH) or Campers Plane (CP). The 3D registration joint can be rapidly and precisely fixed with only one tommy screw. The use of lightweight carbon-fibre components and an exchangeable nose pad ensure high wearing comfort.

Delivery forms

UTS 3D	593710	
Adjustable nosepiece	1x	
Reference plane indicator (CP/FH)	1x	
Axis pins	2x	
Earpieces	2x	
Registration joint	1x	
Bite forks	2x	
Nose pads	10x	

UTS 3D accessories

3D registration joint

The 3D registration joint can be used for the UTS 3D and UTS transferbows (older version). The registration joint can be rapidly and precisely be fixed with only one tommy screw.

Delivery forms

3D registration joint	1x	594566
-----------------------	----	--------

Bite forks

- a) 3D bite fork "S"
- b) 3D bite fork

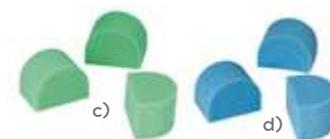

Delivery forms

3D bite fork "S"	1x	601119
3D bite fork	1x	594567

Nose pads

- c) Set of nose pads green (medium)
- d) Set of nose pads blue (soft)

Delivery forms

Nose pads set		
Green = medium	5x	561265
Blue = soft	5x	561266

UTS support pins type II

The UTS support pin type II enables a direct, individual model transfer from the transferbow to the articulator.

Delivery forms

UTS support pins type II		536400
Base part	1x	
Pins	2x	
Various accessories		

Gnathometer M incl. UTS adapter

Gnathometer M incl. UTS adapter is an intraoral registration device according to Prof. Dr Böttger for the determination of occlusal positions of edentulous patients. The Gnathometer M is equipped with an adapter to connect it to the UTS 3D transferbow.

Delivery forms

Gnathometer M (complete)	1x	530484
---------------------------------	-----------	---------------

Preparation and registration in the Digital Denture workflow

The fabrication of complete dentures using CAD/CAM technology requires specific instruments along the process chain. The workflow starts with impression taking and the recording of the patient situation using several clinical auxiliary tools for optimized individual data recording. This information is transferred to the design software and is subsequently included in the design of the denture.

Gnathometer CAD

Gnathometer CAD is an intraoral needle point tracing apparatus to determine the individual centric jaw joint position in edentulous patients.

The registration plates feature special click connections. This mechanism allows occlusal rims and registration plates to be attached and removed very easily in order to carry out the different working steps. For digitization, the registration is placed in the scanner by means of a special impression holder.

- ✓ Material registration plates: stainless steel
- ✓ Material occlusal rims: white POM
- ✓ Material fixation plates: clear PMMA
- ✓ Adjustment of the height of the stylus: 5 mm
- ✓ Weight: 29 g

Delivery forms

Gnathometer CAD	1 pc.	687679
Registration plate upper	1x	
Registration plate lower	1x	
Occlusal rim	2x	
Fixation plate	1x	
Fixation screw	1x	
Washer	1x	
Stylus	1x	

Accessories

Occlusal rims for Gnathometer CAD	10 pcs	687681
Fixation plates for Gnathometer CAD	5 pcs	687682

UTS CAD

UTS CAD is a registration device for measuring the angle of the occlusal plane in relation to Camper's plane (CP) and the bipupillary line (BP).

The measured angle or deviation of the occlusal plane from CP / BP can be transferred to the design software to reproduce the correct position of the occlusal plane in the design of the denture.

- ✓ Material metal parts: anodized aluminium, stainless steel
- ✓ Material side arms: carbon fibre composite material, NBR (nitrile rubber)
- ✓ Adjustment possibilities: CE angle $+20^{\circ}$ to -30°
BP angle $\pm 15^{\circ}$
- ✓ Side length basic bow: 200 mm
- ✓ Width basic bow: front 155 mm, back 225 mm
- ✓ Weight: 98 g (incl. bite fork)

Delivery forms

UTS CAD	1 pc.	687680

3D bite forks	5 pcs	594567

Resin veneering material

PMMA

SR Ivocron®

SR Ivocron® is a high-quality PMMA veneering material for crown, bridge and temporary applications. It comes in the 20 shades of the Chromascop® shade guide and offers natural-looking results.

SR Ivocron is ideally matched to all Ivoclar products in Chromascop shades.

The individual choice of the working technique enables the fabrication of true-to-nature composite veneers (hot/press technique) as well as the fabrication of long-term temporaries and the cementation of denture teeth (cold technique). The combination of the SR Link bonding system and the SR Ivocron veneering material is optimally suited for durable, high-quality veneers.

SR Ivocron® Cold Liquid

Liquid material for the cold technique (pouring technique)

Delivery forms

SR Ivocron® Cold Liquid	1 x 100 ml	550080
	1 x 500 ml	550081

SR Ivocron® Hot Liquid

Lab composite

SR Nexco®

SR Nexco® is a purely light-curing laboratory composite with micro-opal fillers, suitable for framework-supported and framework-free prosthetic restorations.

As the desired shades can be reproduced regardless of the layer thickness, a true-to-nature appearance can be achieved for fixed and removable dental restorations, including artificial gingiva.

SR Nexco® Paste Promo Kit A2

Delivery forms

SR Nexco® Paste Promo Kit A2	645933

C (blue)		573103

OptraSculpt® Pad

OptraSculpt® Pad is a contouring instrument with special foam pad attachments, designed for the efficient, non-stick forming and shaping of composites. The highly flexible synthetic foam pads optimally adjust to the tooth shape and allow restorations to be smoothly contoured, without leaving any unwanted marks on the composite.

Indications

OptraSculpt® Pad is suitable for adapting, shaping and contouring uncured sculptable composite materials. It is also suitable for lab composites.

Delivery forms

Assortment	639791	
OptraSculpt Pad Instrument	1x	
OptraSculpt Pad refill/4 mm	60x	
OptraSculpt Pad refill/6 mm	60x	
OptraSculpt® Pad refill/4 mm	60x	639792

Light-curing units

PrograPrint® Cure

The PrograPrint Cure is a LED light-curing unit designed for curing printed objects. The unit is characterized by its high light intensity. Reflective coating distributes the light evenly inside the curing chamber and ensures that the printed objects are optimally illuminated. The curing chamber is spacious enough to accommodate the printed parts together with the build platform of the PrograPrint PR5. PrograPrint Cure provides a consistently high light intensity and can therefore also be used for curing light-curing lab composites, e.g. SR Nexco. Pre-set curing programs provide a high level of user comfort. Users can also set up their own programs for other materials they may want to cure in the unit.

The object tray is universal and can be used for the C&B technique in different ways to satisfy different needs.

Technical data

Light intensity	274 mW/cm ² ± 10%
Wavelength range	405/460 nm
Voltage	100–240 V/50–60 Hz
Operation	Touchscreen
Dimensions (mm) W x H x D	245 x 440 x 490
Weight	17 kg

Metal-ceramics

Leucite fluorapatite oxyapatite metal-ceramic

IPS Style®

IPS Style® is the first patented metal-ceramic to contain oxyapatite crystals. These crystals, in combination with leucite and fluorapatite crystals and the matching glass phases, are responsible for the excellent handling characteristics and optical properties of this low-fusing mixed glass-ceramic. Due to the high degree of versatility and easy handling of the layering materials,

IPS Style supports both newcomers and experienced users in their individual working styles.

The IPS Style ceramic system is designed for the classic CTE range and comprises components for single and multiple layer techniques. The materials are all matched to the stains and glazes of the versatile IPS Ivocolor® und IPS e.max® Ceram Art assortment.

IPS Style® Ceram Starter Kit A-D

(with powder opaquer)

The IPS Style® Ceram Starter Kit A-D comprises the most popular materials to fabricate restorations in the shades A1, A2, A3 and A3.5. The opaquer is available in powder form.

Additionally, the kit provides the required working accessories. It also contains different Shades and Essences of the IPS Ivocolor® universal stains and glaze range for the characterization and staining of restorations.

Delivery forms

IPS Style® Ceram Starter Kit A-D	679925
IPS Style Ceram Powder Opaquer 870, shades: A1, A2, A3, A3,5	1 x 18 g each
IPS Style Ceram Deep Dentin, shades: A1, A2, A3, A3,5	1 x 20 g each
IPS Style Ceram Dentin, shades: A1, A2, A3, A3,5	1 x 20 g each
IPS Style Ceram Incisal, shades: I1, I2, I3, I4	1 x 20 g each

IPS Style® Ceram Mamelon

IPS Style® Ceram Mamelon are intensely coloured, opaque effect powders that are used to accentuate the incisal third. Depending on the working habits of the user, the material is applied in thin stripes on reduced dentin.

Delivery forms

IPS Style® Ceram Mamelon	1 x 20 g	
light		673308
yellow-orange		673309
salmon		673310

IPS Style® Ceram Occlusal Dentin

IPS Style® Ceram Occlusal Dentin materials are suitable for individualizing occlusal surfaces in particular. They can also be used in cervical, palatal and lingual areas.

Delivery forms

IPS Style® Ceram Occlusal Dentin	1 x 20 g	
orange		673311
brown		673312

IPS Style® Ceram Opal Effect

The IPS Style® Ceram Opal Effect materials are specially shaded incisal materials that permit the simulation of the dynamic photo-optical capabilities of natural teeth.

Delivery forms

IPS Style® Ceram Opal Effect	1 x 20 g	
1		673314
2		673315
3		673316
4		673317
5		673318
violet		673319

IPS Style® Ceram Transpa

The IPS Style® Ceram Transpa materials are available in different shade nuances. They are suitable to reproduce shaded, transparent areas, particularly in the incisal third.

Delivery forms

IPS Style® Ceram Transpa	1 x 20 g	
clear		673301
neutral		673302
blue		673303
brown-grey		673304
orange-grey		673305
IPS Style® Ceram Transpa	1 x 100 g	
clear		673306
neutral		673307

IPS Style® Ceram Special Incisal

The IPS Style® Ceram Special Incisal materials may either be mixed with IPS Style Incisal materials to modify and intensify the shade or be applied directly.

Delivery forms

IPS Style® Ceram Special Incisal	1 x 20 g	
yellow		673320
grey		673321

IPS Style® Ceram Inter Incisal

The IPS Style® Ceram Inter Incisal material is used to increase the brightness value of the incisal third. It is applied directly to the dentin in the rough shape of a butterfly.

Delivery forms

IPS Style® Ceram Inter Incisal	1 x 20 g	
white-blue		673322

IPS Style® Ceram Cervical Transpa

The IPS Style® Ceram Cervical Transpa materials reproduce the shades with a more intensive translucency and support the natural transition from the gingiva to the veneer.

Delivery forms

IPS Style® Ceram Cervical Transpa	1 x 20 g	
yellow		673323
orange-pink		673324
khaki		673325
orange		673326

IPS Style® Ceram Incisal

The IPS Style® Ceram Incisal materials are modelled according to the natural incisal material. In combination with the Dentin materials, they help achieve the correct A-D shade.

Delivery forms

IPS Style® Ceram Incisal	1 x 20 g

IPS Style® Ceram Incisal Edge

IPS Style® Ceram Incisal Edge is used to achieve what is known as the halo effect, which occurs in natural teeth by the refraction of light at the incisal edges.

Delivery forms

IPS Style® Ceram Incisal Edge	1 x 20 g	673313
-------------------------------	----------	--------

IPS Style® Ceram Gingiva

The IPS Style® Ceram Gingiva materials are specially shaded ceramic materials for the lifelike reconstruction of gingiva components. They are coordinated with the Gingiva Solution shade system from Ivoclar and allow true-to-nature esthetics to be achieved due to the comprehensive offering of Gingiva and Intensive Gingiva shades.

Delivery forms

IPS Style® Ceram Gingiva	1 x 20 g	
1		673344
2		673345
3		673346

IPS® Paste Opaquer Liquid	1 x 15 ml	701588
---------------------------	-----------	--------

IPS® Margin build-up liquid

The IPS® Margin build-up liquids are designed for the exclusive use with IPS Style® Ceram. They are available in two variants:

- ✓ **allround:** for producing a consistency that is suitable for conventional processing and drying
- ✓ **carving:** for a shorter processing time and faster drying

Delivery forms

IPS® Margin build-up liquid	1 x 60 ml	
allround		673373
carving		673374

IPS® build-up liquid

The IPS® build-up liquid can be used with IPS e.max® Ceram and IPS Style® Ceram.

- ✓ **allround:** for producing a consistency that is suitable for conventional processing and drying

Delivery forms

IPS® build-up liquid		
allround	1 x 60 ml	673375
	1 x 250 ml	673377

Accessories

IPS Style® Ceram material shade guide

The shade guides for IPS Style® Ceram are supporting tools for determining the shade. To prevent cross-contamination in the oral cavity, the individual tabs and the entire shade guide are autoclavable.

Delivery forms

IPS Style® Ceram Impulse material shade guide	1x	674210
IPS Style® Ceram Incisal/Transpa material shade guide	1x	674208
Gingiva Solution material shade guide	1x	674209

Leucite metal-ceramics

IPS InLine®

Optimize your working procedures and simultaneously increase the productivity and economic efficiency of your laboratory.

With the IPS InLine leucite metal-ceramic system, you will have the flexibility required for today's everyday laboratory work – from simple layering to highly esthetic veneers.

After the application of the opaquer, you can choose the product and the corresponding processing procedure according to your personal preferences and the clinical situation.

IPS InLine® One

The modern one-layer metal-ceramic IPS InLine One – suitable for alloys with a CTE in the range of $13.8\text{--}15.0 \times 10^{-6} \text{ K}^{-1}$ (25–500 °C) – offers quick and efficient layering options. Esthetic results are achieved with little effort.

IPS InLine®

The conventional IPS InLine metal-ceramic for alloys in the CTE range of $13.8\text{--}15.0 \times 10^{-6} \text{ K}^{-1}$ (25–500 °C) is characterized by easy processing and ideal shade and firing stability.

The universal stains and glaze assortment IPS Ivocolor® or IPS e.max® Ceram Art is used to individually stain and characterize the restorations.

IPS InLine® Add-On Margin	1 x 20 g	593344

IPS InLine® System Add-On 690 °C/1274 °F

This low-fusing add-on material is used for subsequent corrections and adjustments of shape on already fired IPS InLine restorations.

Delivery forms

IPS InLine® System Add-On 690 °C/1274 °F	1 x 20 g	602386
--	----------	--------

IPS InLine® System Opaquer Liquid

This liquid is used to slightly dilute dried opaquer materials. It must not be used for diluting the paste opaquer.

Delivery forms

IPS InLine® System Opaquer Liquid	1 x 15 ml	593345
-----------------------------------	-----------	--------

IPS InLine® System Powder Opaquer Liquid

This liquid is used to mix the IPS InLine® System Powder Opaquer.

Delivery forms

IPS InLine® System Powder Opaquer Liquid	1 x 60 ml	649209
	1 x 250 ml	649210

IPS InLine® Margin build-up liquid

This liquid is used to mix the IPS InLine® Margin materials.

Delivery forms

IPS InLine® Margin build-up liquid	1 x 60 ml	593346
------------------------------------	-----------	--------

IPS InLine® System build-up liquid L

The liquid is suitable to mix IPS InLine® ceramic materials for smaller restorations or for smaller portions. The build-up liquid L is particularly suitable for dental technicians who prefer a drier processing procedure – i.e. without having to use continuous suction – since the liquid evaporates much quicker. In this way, IPS InLine can be easily manipulated with an instrument.

Delivery forms

IPS InLine® System build-up liquid L	1 x 60 ml	593348
	1 x 250 ml	593351

IPS InLine® System build-up liquid P

This liquid is suitable for mixing IPS InLine® ceramic materials that will be used for fabricating larger restorations where a longer working time and smooth consistency is desired. The build-up liquid P is suitable for technicians who prefer a long working time and moist material coupled with high stability.

Delivery forms

IPS InLine® System build-up liquid P	1 x 60 ml	593349
	1 x 250 ml	593352

Metal-ceramics

IPS Classic®

IPS Classic® is a well-proven metal-ceramic system for exceptional individuality and creativity. Given the balanced distribution of grain sizes, the ceramic exhibits

excellent modelling properties and high stability, even after several firings.

IPS Classic V is available in the A–D shades.

IPS Classic Starter Kit A3

The IPS Classic® Starter Kit contains an opaquer, dentin and incisal material and includes a glazing paste. It provides all the materials needed to fabricate your first IPS Classic restoration.

Delivery forms

IPS® Classic Starter Kit A3	599041
IPS Classic V Opaquer, shade: A3	1 x 3 g
IPS Classic V Dentin, shade: A3	1 x 20 g
IPS Classic V Incisal, shade: 2	1 x 20 g
IPS Classic Glaze Paste	1 x 3 g
IPS Classic Glazing/Staining Liquid	1 x 15 ml
IPS Classic build-up liquid, shade: L	1 x 60 ml

IPS Classic® V Opaquer

Opaquer pastes with an ideal consistency and excellent stability that ensure an outstanding masking capability even in thin layers. The opaquer pastes are distinguished for their easy and economic processing.

IPS Classic® V	1 x 250 g	
1		747313
2		747314

IPS Classic® Opal Incisal

The opal incisal materials owe their vitality and opalescent effect to the coordinated distribution of grain sizes.

Delivery forms

IPS Classic® Opal	1 x 20 g	
1		531580
2		531581
3		531582
4		531583
5		531584

IPS Classic® V Transparent

Transparent materials to achieve various effects for the reproduction of a true-to-nature incisal area.

Delivery forms

IPS Classic® V Transparent	1 x 20 g	
clear		531647
neutral		531664
IPS Classic® V Transparent	1 x 100 g	
clear		531773
neutral		531774
IPS Classic® V Transparent	1 x 250 g	
clear		747315
neutral		747316

IPS® Impulse

These ready-mixed individual ceramic materials facilitate the application of true-to-nature effects.

Delivery forms

IPS® Impulse Transparent	1 x 20 g	
blue		531703
IPS® Impulse Occlusal Dentin	1 x 20 g	
orange		531700
IPS® Impulse Molar Incisal	1 x 20 g	531697

IPS® Effect

These ready-mixed individual ceramic materials enable the quick and easy reproduction of opalescent effects in the incisal area.

Delivery forms

IPS® Effect	1 x 20 g	
1 super opal		545017
2 opal		545018
3 whitish-opal		545019
4 white opal		545020
5 red-brown opal		545021

IPS® Gingiva

IPS® Gingiva is particularly suitable for esthetic solutions that require a true-to-nature reproduction of the gingival area.

Delivery forms

IPS® Gingiva	1 x 20 g	
1		546667
2		546668
3		546669
4		546670
5		546671

IPS® Gingiva Modifier

IPS® Gingiva Modifier materials can be used for individual characterizations.

Delivery forms

IPS® Gingiva Modifier	1 x 10 g	
2		546673
3		546674
4		546675

IPS® Shade V

The ready-mixed IPS® Shade dentin stains in paste form permit subsequent modification of shades on the fired ceramic restoration. Additionally, they can be mixed with the ceramic materials for individual characterizations.

Delivery forms

IPS® Shade V	1 x 3 g	
A1		531777
A2 / A3 / A3.5		531778
A4		531779
B1		531780

IPS Classic® Add-On Powder

Low-fusing add-on material for IPS Classic® V metal-ceramics. Particularly suitable for small corrections and shape adjustments of fired restorations.

Delivery forms

IPS Classic® Add-On Powder	1 x 20 g	541671
----------------------------	----------	--------

IPS Classic® Glazing Paste

Easy-to-use glazing material in paste form for a true-to-nature gloss on ceramic restorations.

Delivery forms

IPS Classic® Glazing Paste	1 x 3 g	531602
----------------------------	---------	--------

IPS Classic® Glazing/Staining Liquid

Liquid to adjust the consistency of the IPS Classic® Glaze Paste.

Delivery forms

IPS Classic® Glazing/Staining Liquid	1 x 15 ml	529413
--------------------------------------	-----------	--------

IPS Classic® Powder Opaquer Liquid

This liquid is used to mix the IPS Classic V Powder Opaquer.

Delivery forms

IPS Classic® Powder Opaquer Liquid	1 x 60 ml	666173
	1 x 250 ml	666174

IPS Classic® build-up liquid L (long-term)

Build-up liquid "L" has been developed for technicians who require a longer working time, as well as for markets in warmer regions. The liquid contains an additive that raises the boiling point and ensures slower evaporation of the liquid. This results in a prolonged working time while the excellent build-up properties remain unchanged.

Delivery forms

IPS Classic® build-up liquid L	1 x 60 ml	529398
	1 x 250 ml	529402

IPS Classic® build-up liquid N (standard)

This build-up liquid is particularly suitable for technicians who apply the ceramic materials in small portions using a brush. Build-up liquid N provides outstanding stability and demonstrates optimum build-up properties. This material is used by technicians who prefer moist conditions, i.e. no excessive suction. Moreover, build-up liquid N is suitable for everyday use and for most of the layering techniques.

Delivery forms

IPS Classic® build-up liquid N	1 x 60 ml	529397
	1 x 250 ml	529401

Liquids

IPS® Model Sealer

The IPS® Model Sealer is used to seal the plaster model. It seals the stone pores and thus prevents the moisture of the ceramic from being absorbed by the stone.

Delivery forms

IPS® Model Sealer	1 x 50 ml	593401
-------------------	-----------	--------

IPS® Margin Sealer

The IPS® Margin Sealer is used to seal the plaster die when fabricating a ceramic shoulder.

Delivery forms

IPS® Margin Sealer	1 x 20 ml	593402
--------------------	-----------	--------

IPS® Ceramic Separating Liquid

This ceramic separating liquid is used on areas that have been sealed with either the IPS® Model Sealer or the IPS® Margin Sealer liquid. Use of this liquid will ensure a clean separation between the ceramic material and the stone model and/or die.

Delivery forms

IPS® Ceramic Separating Liquid	1 x 15 ml	593403
--------------------------------	-----------	--------

Metal-free veneering ceramics

IPS e.max®

IPS e.max® Ceram Starter Kit

The IPS e.max® Ceram Starter Kit contains the most popular Dentin shades, the corresponding Incisal materials, as well as the necessary processing accessories. The Starter Kit and all the other additional assortments are supplied in a material box and can be supplemented with any other IPS e.max kit and IPS e.max Ceram Art.

Delivery forms

IPS e.max® Ceram Starter Kit A-D	681625
IPS e.max Ceram Dentin, shades: A1, A2, A3, A3.5	1 x 20 g each
IPS e.max Ceram Transpa Incisal, shades: TI 1, TI 2	1 x 20 g each
IPS e.max Ceram Transpa, shades: neutral, clear	1 x 20 g each
IPS e.max Ceram Add-On, shades: Dentin, Incisal	1 x 20 g each
IPS build-up liquid (allround)	1 x 60 ml
IPS Ivocolor Glaze Powder FLUO	1 x 1.8 g
IPS Ivocolor Glaze Paste FLUO	1 x 3 g
IPS Ivocolor Mixing Liquid (allround)	1 x 15 ml
IPS Model Sealer	1 x 50 ml
IPS Ceramic Separating Liquid	1 x 15 ml
IPS e.max Ceram Dentin A-D-material shade guide	1x
IPS e.max Ceram Incisal/Transpa material shade guide	1x

IPS e.max® Ceram Intro Kit (A2)

The IPS e.max® Ceram Intro Kit contains a selection of IPS e.max Ceram materials and liquids in small packaging sizes for the fabrication of the first IPS e.max veneers.

Delivery forms

IPS e.max® Ceram Intro Kit A2	681628
IPS e.max Ceram ZirLiner, shade: 1	1 x 5 g
IPS e.max Ceram Margin, shade: A2	1 x 5 g
IPS e.max Ceram Deep Dentin, shade: A2	1 x 5 g
IPS e.max Ceram Dentin, shade: A2	1 x 5 g
IPS e.max Ceram Transpa Incisal: Shade: TI 1	1 x 5 g
IPS e.max Ceram Transpa, shade: clear	1 x 5 g
IPS e.max Ceram Opal Effect, shades: 1, 3	1 x 5 g each
IPS e.max Ceram Occlusal Dentin, shade: orange	1 x 5 g
IPS e.max Ceram Mamelon, shade: light	1 x 5 g
IPS Ivocolor Essence, shades: white, sunset, mahogany	1 x 1.8 g each
IPS Ivocolor Shade Dentin, shade: SD 1	1 x 3 g
IPS Ivocolor Glaze Powder Fluo	1 x 1.8 g
IPS e.max Ceram ZirLiner Liquid	1 x 15 ml
IPS e.max Ceram Margin Liquid allround	1 x 15 ml
IPS build-up liquid allround	1 x 15 ml
IPS Ivocolor Mixing Liquid allround	1 x 15 ml

IPS e.max® Ceram Power Dentin Kit

The kit includes IPS e.max® Ceram Power Dentin (PD) and IPS e.max Ceram Power Incisal (PI) in the eight most popular A–D shades. They are designed for the fabrication of restorations that require increased brightness. The materials are especially suited for the veneering of translucent frameworks, e.g. zirconium oxide.

Delivery forms

IPS e.max® Ceram Power Dentin Kit	681627
IPS e.max Ceram Power Dentin, shades: A1, A2, A3, A3.5, B1, B2, C1, D2	1 x 20 g each
IPS e.max Ceram Power Incisal, shades: PI 1, PI 2, PI 3	1 x 20 g each

IPS e.max® Ceram Deep Dentin Kit

The Deep Dentin materials with true-to-nature fluorescence, enhanced opacity, and shade saturation ensure that the basic tooth shade is achieved even in very thin layers and thus permit the fabrication of restorations that exhibit lifelike shades. The kit contains the most popular shades (A–D).

Delivery forms

IPS e.max® Ceram Deep Dentin Kit A–D	596834
IPS e.max Ceram Deep Dentin, shades: A1, A2, A3, A3.5, B2, B3, C2, D3	1 x 20 g each
IPS e.max Ceram Deep Dentin A–D material shade guide	1x

IPS e.max® Ceram Impulse Kit

The IPS e.max® Ceram Impulse materials have been designed in accordance with the other Ivoclar veneering materials. A total of 22 Impulse materials for individualized characterizations are available.

Delivery forms

IPS e.max® Ceram Impulse Kit	596835
IPS e.max Ceram Impulse Occlusal Dentin, shades: orange, brown	1 x 20 g each
IPS e.max Ceram Impulse Mamelon, shade: light, yellow-orange, salmon	1 x 20 g each
IPS e.max Ceram Impulse Opal Effect, shades: OE 1, OE 2, OE 3, OE 4, OE 5, violet	1 x 20 g each
IPS e.max Ceram Impulse Transpa, shades: blue, brown-grey, orange-grey	1 x 20 g each
IPS e.max Ceram Impulse Incisal Edge	1 x 20 g
IPS e.max Ceram Impulse Special Incisal, shades: yellow, grey	1 x 20 g each
IPS e.max Ceram Impulse Inter Incisal, shade: white-blue	1 x 20 g
IPS e.max Ceram Impulse Cervical Transpa, shades: yellow, orange-pink, khaki, orange	1 x 20 g each
IPS e.max Ceram Impulse materia shade guide	1x

IPS e.max® Ceram Gingiva Kit

A total of 12 Gingiva ceramic materials and a liner for lifelike gingiva parts, particularly in the fabrication of implant-supported restorations. Five lifelike gingival materials that are used in combination with the four Intensive Gingiva and three Essence powders, depending on the desires of the patient. IPS e.max® Ceram ZirLiner Gingiva is included for use in conjunction with zirconium oxide.

Delivery forms

IPS e.max® Ceram Gingiva Kit	602316
IPS e.max Ceram ZirLiner Gingiva	1 x 5 g
IPS e.max Ceram Gingiva, shades: 1, 2, 3, 4, 5	1 x 20 g each
IPS e.max Ceram Intensive Gingiva, shades: 1, 2, 3, 4	1 x 20 g each
IPS e.max Ceram Essence, shades: rose, berry, aubergine	1 x 5 g each
IPS e.max Ceram Gingiva shade guide	1x

IPS e.max® Ceram Selection Kit

IPS e.max® Ceram Selection Kit comprises twelve Enamel and Effect materials that are especially designed to give professionals more room for creativity and individuality in the layering technique. The materials are used in combination with the existing IPS e.max Ceram materials. The renowned dental technicians Oliver Brix (Germany), August Bruguera (Spain) and Gérald Ubassy (France) have substantially shaped the concept on which IPS e.max Ceram Selection is based. The specially shaded materials and their application are the result of many years of successful work with IPS e.max Ceram.

Delivery forms

IPS e.max® Ceram Selection Kit	684732
IPS e.max Ceram Special Enamel, shades: acqua, citrine, honey, apricot, quartz, diamond	1 x 5 g each
IPS e.max Ceram Light Reflector, shades: cream, salmon, silk	1 x 5 g each
IPS e.max Ceram Light Absorber, shades: fog, lavender, taupe	1 x 5 g each

IPS e.max® Ceram ZirLiner

- ✓ **IPS e.max® Ceram ZirLiner 1-4**
Used to provide white zirconium oxide frameworks with a shaded character. They help adjust the framework shade to the basic ingot and/or block shade (Medium Opacity) of IPS e.max Press and IPS e.max CAD.
- ✓ **IPS e.max® Ceram ZirLiner clear**
Used for shaded zirconium oxide frameworks, for Bleach shades, as well as to mix with IPS e.max Ceram Intensive ZirLiner.

clear		609434

IPS e.max® Ceram Margin

The IPS e.max® Ceram Margin (A–D) materials exhibit true-to-nature cervical fluorescence and are used for the fabrication of ceramic shoulders on IPS e.max ZirCAD frameworks. Due to the difference in the firing temperature to the dentin and incisal materials, the Margin materials demonstrate excellent firing stability.

Delivery forms

IPS e.max® Ceram Margin	1 x 20 g

A2		596874
A3		596875
C2		596883

IPS e.max® Ceram Deep Dentin

The IPS e.max® Ceram Deep Dentin materials with true-to-nature fluorescence, enhanced opacity, and shade saturation ensure that the basic tooth shade is achieved even if space is limited and thus permit the fabrication of restorations that exhibit lifelike shades. Furthermore, the materials are used to intensify the chroma and to accommodate the gingiva in the pontic area to achieve a harmonious shade transition between the gingiva and the cervical area.

IPS e.max® Ceram Impulse Occlusal Dentin

The Occlusal Dentin materials are available in two different shades. They are used as the shade basis for the occlusal surface and to intensify the chroma.

Delivery forms

IPS e.max® Ceram Impulse Occlusal Dentin	1 x 20 g	
orange		596983
brown		596984

IPS e.max® Ceram Impulse Mamelon

The Mamelon materials are available in three different shade gradations. They demonstrate high opacity and excellent masking capabilities even when applied in very thin layers. Depending on the working habits of the user, these materials are applied in thin lines on the reduced dentin. In this way, an individualized appearance of the incisal third is achieved.

Delivery forms

IPS e.max® Ceram Impulse Mamelon	1 x 20 g	
light		596986
yellow-orange		596987
salmon		596988

IPS e.max® Ceram Impulse Incisal Edge

This material is used to achieve what is known as the halo effect, which is caused in natural teeth by the light refraction at the incisal edge.

Delivery forms

IPS e.max® Ceram Impulse Incisal Edge	1 x 20 g	596996
---------------------------------------	----------	--------

IPS e.max® Ceram Impulse Opal Effect

The Opal Effect materials are available in six shade gradations. Starting with Opal Effect 1 – with naturally enhanced opalescence and simultaneous high translucency – the brightness value between Opal Effect 2 and Opal Effect 4 is continuously increased. Opal Effect 5 then demonstrates the typical opal shade. The Opal Effect violet material is used to reduce the brightness value in the incisal area.

Delivery forms

IPS e.max® Ceram Impulse Opal Effect	1 x 20 g	
1		596990
2		596991
3		596992
4		596993
5		596994
violet		596995

IPS e.max® Ceram Impulse Transpa

The Transpa materials are available in three shade variations. They are used to accurately reproduce transparent areas in full detail, particularly in the incisal third.

Delivery forms

IPS e.max® Ceram Impulse Transpa	1 x 20 g	
Blue		597000
Brown-grey		597001
Orange-grey		597002

IPS e.max® Ceram Impulse Special Incisal

The Special Incisal materials are used to intensify the shade effect in the incisal area. They may be applied either directly or as an intermediate layer between dentin and incisal.

Delivery forms

IPS e.max® Ceram Impulse Special Incisal	1 x 20 g	
Yellow		597004
Grey		597005

IPS e.max® Ceram Impulse Inter Incisal

Inter Incisal is a special incisal material, which is used to increase the brightness value in the incisal third or if the brightness value of the incisal area is high and space is limited.

Delivery forms

IPS e.max® Ceram Impulse Inter Incisal	1 x 20 g	
White-blue		597006

IPS e.max® Ceram Impulse Cervical Transpa

With the shaded Cervical Transpa materials, a lifelike in-depth effect is achieved in the cervical third. Compared to conventional Transpa materials, these special materials demonstrate a slightly higher fluorescence.

Delivery forms

IPS e.max® Ceram Impulse Cervical Transpa	1 x 20 g	
Yellow		597008
Orange-pink		597009
Khaki		597010
Orange		597011

IPS e.max® Ceram Gingiva

A total of 12 Gingiva ceramic materials for lifelike gingiva designs, particularly in the fabrication of implant-supported restorations.

Five lifelike gingival materials can be used in combination with the 4 intensive Gingiva and 3 Essence powders to suit the individual preferences of the patient. IPS e.max® Ceram ZirLiner Gingiva is especially designed for use in conjunction with zirconium oxide.

IPS e.max® Ceram Selection

✓ Special Enamel

The six Special Enamel materials are differently shaded Enamel materials that feature an enamel-like translucency.

✓ Light Reflector

The three Light Reflector materials are light reflecting Effect materials.

✓ Light Absorber

The three Light Absorber materials are light absorbing Effect materials.

IPS e.max® Ceram Shade

- ✓ The five **IPS e.max® Ceram Shades** in A-D- and Chromascop® shades are used for final shade modifications of IPS e.max restorations and for the wash firing.
- ✓ The two **IPS e.max® Ceram Shades Incisal** materials are especially suitable for fully anatomical restorations (e.g. IPS e.max ZirPress). They are used to imitate the incisal area and they provide the incisal third with optical translucency and an in-depth effect.

Delivery forms

IPS e.max® Ceram Shade	1 x 3 g	
0		597033
1		597034
2		597035

I2		597039

IPS e.max® Ceram Glaze

- ✓ **IPS e.max® Ceram Glaze** is available in both a paste form and a powder form. Glazing material is applied to all areas of the restoration that have been veneered with IPS e.max Ceram and thus exhibit sufficient fluorescence due to the veneering material.
- ✓ **IPS e.max® Ceram Glaze FLUO** is also available in the proven paste form and in powder form. The fluorescent glazing materials are used in those areas of the restoration that have not been veneered with IPS e.max Ceram. Additionally, they are applied to frameworks that show no or very little fluorescence and for which fully or partially anatomical reduction has been carried out.
- ✓ **IPS e.max® Ceram Glaze Spray**
For the easy and fast glazing of full-contour pressed/milled or layered IPS e.max restorations (the spray must not be applied on IPS e.max CAD when in its uncrystallized "blue" state).

Delivery forms

IPS e.max® Ceram Glaze Paste	1 x 3 g	597041
Glaze Paste FLUO		597042
IPS e.max® Ceram Glaze Powder	1 x 5 g	597044
Glaze Powder FLUO		597045
IPS e.max® Ceram Glaze Spray	1 x 120 ml	609433AN

IPS e.max® Ceram Add-On

IPS e.max® Ceram Add-On materials are available in three shades. Depending on individual requirements, users may select between a Margin, Dentin, and Incisal shade and opacity. The pre-shaded Add-On materials make it even easier to apply adjustments.

Delivery forms

IPS e.max® Ceram Add-On	1 x 20 g	
BL		602461
Margin		597047
Dentin		597048
Incisal		597049

IPS e.max® Ceram ZirLiner build-up liquid

The IPS e.max® Ceram ZirLiner build-up liquid allround is exclusively used to mix the IPS e.max Ceram ZirLiner powders. The ZirLiner Liquid provides the materials with a creamy and ductile consistency and thus enables an easy and efficient application of the ZirLiner. If a different consistency is desired, the liquid may also be mixed with the other IPS e.max Ceram Liquids in any mixing ratio.

Delivery forms

IPS e.max® Ceram ZirLiner build-up liquid	1 x 60 ml	
Allround		597050

IPS e.max® Ceram Margin build-up liquid

The IPS e.max® Ceram Margin build-up liquid is available as an allround liquid. It allows the consistency to be adjusted to enable conventional margin processing and drying.

Delivery forms

IPS e.max® Ceram Margin build-up liquid	1 x 60 ml	
Allround		597052

IPS® build-up liquid

The IPS® build-up liquids are suitable for both IPS e.max® Ceram and IPS Style® Ceram. They are available in two versions:

- ✓ **allround:** suitable for adjusting the consistency for conventional processing and drying
- ✓ **soft:** for shorter processing times and faster drying

Delivery forms

IPS® build-up liquid	1 x 60 ml	
Allround		673375
Soft		673376
IPS® build-up liquid	1 x 250 ml	
Allround		673377
Soft		673378

IPS e.max® Ceram Glaze and Stain Liquid

IPS e.max® Ceram Glaze and Stain Liquids are available in two different versions:

- ✓ With the **allround liquid**, a consistency suitable for conventional processing and drying is achieved. Powders mixed with allround liquid feature a shorter processing time (approx. 1/2 day).
- ✓ With the **longlife liquid**, a slightly pasty consistency is achieved. Powders mixed with longlife liquid can be used over a longer period of time (approx. 1 week).

Delivery forms

IPS e.max® Ceram Glaze and Stain Liquid	1 x 15 ml	
Allround		597058
Longlife		597059

IPS e.max® Ceram material shade guides

The shade guides of the IPS e.max® Ceram materials are an integral part of the product concept. The shade guides and the individual shade tabs can be sterilized in an autoclave to prevent cross-contamination in the oral cavity. The dentin shade tabs feature a textured surface and anatomical shape for light refraction purposes. The other shade tabs are slightly wedge shaped to better illustrate the translucency of the individual materials.

The individual attachments and holders of the IPS e.max Ceram shade guides are coloured light grey to differentiate them from the shade guides of other materials (e.g. IPS d.SIGN®, IPS InLine®).

Universal stains and glazes

IPS e.max® Ceram Art

IPS e.max® Ceram Art Essence/Shade Assortment

Glaze and stain pastes for glazing and characterization in the white esthetic area.

Delivery forms

IPS e.max® Ceram Art Essence/Shade Assortment	767450
IPS e.max Ceram Art Magic Glaze FLUO	1 x 3 g
IPS e.max Ceram Art Essence, shades: white, cream, lemon, sunset, copper, khaki, mahogany, anthracite	1 x 3 g each
IPS e.max Ceram Art Shade Dentin, shades: 1 (BL), 2 (A), 3 (B), 4 (C), 5 (D)	1 x 3 g each
IPS e.max Ceram Art Shade Incisal, shades: 1, 2	1 x 3 g each
IPS e.max Ceram Art Universal Liquid	1 x 60 ml

IPS e.max® Ceram Art Illusion Structure Assortment

Glaze, Illusion and structure pastes for glazing and characterization in the white esthetic area.

Delivery forms

IPS e.max® Ceram Art Illusion Structure Assortment	767451
IPS e.max Ceram Art Magic Glaze FLUO	1 x 3 g
IPS e.max Ceram Art Illusion Mamelon, shades: reddish-orange, light salmon	1 x 5 g each
IPS e.max Ceram Art Illusion Opal, shades: light-blue, sky-blue, night-blue	1 x 5 g each
IPS e.max Ceram Art Illusion Halo, shades: ivory, ocher	1 x 5 g each
IPS e.max Ceram Art Illusion Enamel, shade: pearl	1 x 5 g
IPS e.max Ceram Art Illusion Absorber, shades: light-violet, fog, quartz	1 x 5 g each
IPS e.max Ceram Art Illusion Cervical, shades: yellow-pink, nude	1 x 5 g each
IPS e.max Ceram Art Shade Dentin, shades: 2 (A), 3 (B)	1 x 3 g each
IPS e.max Ceram Art Structure, shades: neutral, cloud	1 x 5 g each
IPS e.max Ceram Art Universal Liquid	1 x 60 ml

IPS e.max® Ceram Art Gingiva Illusion & Structure Assortment

Glaze, Illusion gingiva and gingiva structure pastes for glazing and characterization in the red esthetic area.

Delivery forms

IPS e.max® Ceram Art Illusion & Structure Assortment		767452
IPS e.max Ceram Art Magic Glaze	1 x 3 g	
IPS e.max Ceram Art Illusion Gingiva Base, shades: rose, pink, orange-pink	1 x 5 g each	
IPS e.max Ceram Art Illusion Gingiva, shades: soft-mauve, intense-mauve, light-margin, dark-margin, soft-bone, intense-bone, capillary, fibers, intense-red	1 x 5 g each	
IPS e.max Ceram Art Structure Gingiva, shades: soft-pink, pink	1 x 5 g each	
IPS e.max Ceram Art Universal Liquid	1 x 60 ml	

IPS e.max® Ceram Art Magic Glaze

- **IPS e.max® Ceram Art Magic Glaze FLUO paste** is designed for use on monolithic tooth-coloured restorations made of zirconium oxide (ZrO₂) and lithium disilicate (LS₂).
- **IPS e.max® Ceram Art Magic Glaze paste** is designed for use on gingival areas made of zirconium oxide (ZrO₂) or lithium disilicate (LS₂) and on ceramic veneering materials.

Delivery forms

IPS e.max® Ceram Art Magic Glaze FLUO	1 x 3 g	767420
	1 x 9 g	767422
IPS e.max® Ceram Art Magic Glaze	1 x 3 g	767421
	1 x 9 g	767423

IPS e.max® Ceram Art Essence

IPS e.max® Ceram Art Essence pastes are highly pigmented and can be applied to the restoration for individualized surface characterization.

Delivery forms

IPS e.max® Ceram Art Essence	1 x 3 g
white	767378
cream	767379
lemon	767380
sunset	767381

khaki	767383
mahogany	767384
anthracite	767385

IPS e.max® Ceram Art Shade

IPS e.max® Ceram Art Shade pastes are used for adjusting the shade of ceramic restorations to match A-D and Bleach shades.

IPS e.max Ceram Art Shade Incisal 1 and Incisal 2 are incisal materials designed to enhance depth and translucency.

Delivery forms

IPS e.max® Ceram Art Shade	1 x 3 g
Dentin 1 (BL)	767456
Dentin 2 (A)	767457
Dentin 3 (B)	767458
Dentin 4 (C)	767459
Dentin 5 (D)	767460
Incisal 1	767461
Incisal 2	767462

IPS e.max® Ceram Art Illusion Mamelon

IPS e.max® Ceram Art Illusion Mamelon pastes are intensely coloured pastes designed for the representation of mamelon structures. They are applied to accentuate the dentin structure in the incisal third.

Delivery forms

IPS e.max® Ceram Art Illusion Mamelon	1 x 5 g
reddish-orange	767424
light-salmon	767425

IPS e.max® Ceram Art Illusion Opal

IPS e.max® Ceram Art Illusion Opal are specially shaded pastes designed to reproduce the dynamic light-optical properties of natural teeth in the enamel area.

Delivery forms

IPS e.max® Ceram Art Illusion Opal	1 x 5 g	
light-blue		767426
sky-blue		767427
night-blue		767428

IPS e.max® Ceram Art Illusion Halo

IPS e.max® Ceram Art Illusion Halo pastes are used to reproduce the halo effect, a natural optical phenomenon created by light reflection at the incisal edge of natural teeth.

Delivery forms

IPS e.max® Ceram Art Illusion Halo	1 x 5 g	
ivory		767429
ocher		767430

IPS e.max® Ceram Art Illusion Enamel

IPS e.max® Ceram Art Illusion Enamel paste is applied to increase the value (brightness) in the incisal third and along the marginal ridges to create a butterfly effect.

Delivery forms

IPS e.max® Ceram Art Illusion Enamel	1 x 5 g	
pearl		767431

IPS e.max® Ceram Art Illusion Absorber

IPS e.max® Ceram Art Illusion Absorber pastes are light-absorbing materials used to lower the value (brightness) in the incisor region and to create areas of light absorption in the incisal and cervical thirds as well as along the proximal surfaces.

Delivery forms

IPS e.max® Ceram Art Illusion Absorber	1 x 5 g	
light-violet		767432
fog		767433
quartz		767434

IPS e.max® Ceram Art Illusion Cervical

IPS e.max® Ceram Art Illusion Cervical pastes help create a natural transition between the restoration and gingiva.

Delivery forms

IPS e.max® Ceram Art Illusion Cervical	1 x 5 g	
yellow-pink		767435
nude		767436

IPS e.max® Ceram Art Illusion Gingiva Base

IPS e.max® Ceram Art Illusion Gingiva Base pastes are used to build up the bulk of the gingival tissue, with the shade selected to match the particular gingival phenotype.

Delivery forms

IPS e.max® Ceram Art Illusion Gingiva Base	1 x 5 g	
rose		767437
pink		767438
orange-pink		767439

IPS e.max® Ceram Art Illusion Gingiva mauve

IPS e.max® Ceram Art Illusion Gingiva pastes in mauve are primarily used for effect characterization in the reproduction of dark gingival tissue (phenotype – purple/brown). In addition, they can be employed to simulate the intense purple vascular structure at the end of the alveolar mucosa.

Delivery forms

IPS e.max® Ceram Art Illusion Gingiva	1 x 5 g	
Gingiva soft-mauve		767440
Gingiva intense-mauve		767441

IPS e.max® Ceram Art Illusion Gingiva bone

IPS e.max® Ceram Art Illusion Gingiva bone pastes are applied in the root region of the gingiva to simulate the appearance of the underlying bone showing through the attached gingiva.

Delivery forms

IPS e.max® Ceram Art Illusion Gingiva	1 x 5 g	
soft-bone		767442
intense-bone		767443

IPS e.max® Ceram Art Illusion Gingiva capillary, fibers, intense-red

IPS e.max® Ceram Art Illusion Gingiva pastes in intense red are used in gingival areas requiring an increased reddish tone, such as areas with vascularization.

Delivery forms

IPS e.max® Ceram Art Illusion Gingiva	1 x 5 g	
capillary		767444
fibers		767445
intense-red		767448

IPS e.max® Ceram Art Illusion Gingiva margin

IPS e.max® Ceram Art Illusion Gingiva margin pastes can be used to characterize the marginal gingiva and interdental papillae.

Delivery forms

IPS e.max® Ceram Art Illusion Gingiva	1 x 5 g	
light-margin		767446
dark-margin		767447

IPS e.max® Ceram Art Structure

Fluorescent IPS e.max® Ceram Art Structure pastes can be easily layered over characterized and glazed restorations to create subtle three-dimensional shade effects and achieve natural macro- and microstructures as well as surface texture.

Delivery forms

IPS e.max® Ceram Art Structure	1 x 5 g	
neutral		767416
cloud		767417

IPS e.max® Ceram Art Structure Gingiva

Non-fluorescent IPS e.max® Ceram Art Structure Gingiva pastes can be layered over characterized and glazed gingival areas to create a subtle three-dimensional shade effect and to reproduce natural macro- and microstructures as well as texture on the surface of the gingiva.

Delivery forms

IPS e.max® Ceram Art Structure Gingiva	1 x 5 g	
soft-pink		767418
pink		767419

IPS e.max® Ceram Art Universal Liquid

IPS e.max® Ceram Art Universal Liquid is a fluid for diluting the following pastes: IPS e.max Ceram Art Magic Glaze, Shade, Essence, Illusion and Illusion Gingiva.

Delivery forms

IPS e.max Ceram Art Universal Liquid

15 ml	767449
60 ml	767463

IPS Ivocolor®

IPS Ivocolor® Intro Kit

IPS Ivocolor® is a universal array of stains and glazes designed for use in conjunction with all IPS ceramic materials.

The IPS Ivocolor Intro Kit contains a small selection of materials to allow users to get familiar with them.

Delivery forms

IPS Ivocolor® Intro Kit	740321AN
IPS Ivocolor Essence, shades: E 01 white, E 04 sunset, E 10 mahogany	1 x 1.8 g each
IPS Ivocolor Shade Dentin, shade: SD2	1 x 3 g
IPS Ivocolor Shade Incisal, shade: SI1	1 x 3 g
IPS Ivocolor Glaze Powder	1 x 1.8 g
IPS Ivocolor Glaze Paste FLUO	1 x 3 g
IPS Ivocolor Mixing Liquid (longlife)	1 x 15 ml

IPS Ivocolor® Starter Kit

IPS Ivocolor® is a universal array of stains and glazes designed for use in conjunction with all IPS ceramic materials.

The IPS Ivocolor Starter Kit comprises the most popular Shade pastes and Essence powders as well as a glaze paste, a glaze powder, two mixing liquids and two material shade guides. The IPS Ivocolor Starter Kit is supplied in a storage box and can be individually supplemented with other products.

Delivery forms

IPS Ivocolor® Starter Kit	667649
IPS Ivocolor Essence, shades: E 01 white, E 02 creme, E 10 mahogany, E 17 anthracite, E 21 basic red	1 x 1.8 g each
IPS Ivocolor Shade Dentin, shades: SD1, SD2, SD4	1 x 3 g each
IPS Ivocolor Shade Incisal, shade: SI1	1 x 3 g
IPS Ivocolor Glaze Powder	1 x 1.8 g
IPS Ivocolor Glaze Paste	1 x 3 g
IPS Ivocolor Mixing Liquid (allround)	1 x 15 ml
IPS Ivocolor Essence Fluid	1 x 15 ml
IPS Ivocolor Shade Guide Essence	1x
IPS Ivocolor Dentin/Incisal	1x

IPS Ivocolor® Essence Kit

The IPS Ivocolor® Essence Kit contains all the IPS Ivocolor Essence shade powders, glaze powders and the accompanying mixing liquids. The assortment includes an IPS Ivocolor Essence material shade guide.

Delivery forms

IPS Ivocolor® Essence Kit	667650
IPS Ivocolor Essence, shades: E 01 white, E 02 creme, E 03 lemon, E 04 sunset, E 05 copper, E 06 hazel, E 07 olive, E 08 khaki, E 09 terracotta, E 10 mahogany, E 11 cappuccino, E 12 espresso, E 13 terra, E 14 profundo, E 15 ocean, E 16 sapphire, E 17 anthracite, E 18 black, E 19 rose, E 20 coral, E 21 basic red, E 22 basic yellow, E 23 basic blue	1 x 1.8 g each
IPS Ivocolor Glaze Powder	1 x 1.8 g
IPS Ivocolor Glaze Powder FLUO	1 x 1.8 g
IPS Ivocolor Mixing Liquid (allround)	1 x 15 ml
IPS Ivocolor Essence Fluid	1 x 15 ml
IPS Ivocolor Shade Guide Essence	1x

IPS Ivocolor® Shade Kit

The IPS Ivocolor® Shade Kit comprises nine Shade Dentin pastes, three Shade Incisal pastes as well as glaze pastes and mixing liquids. In addition, the kit includes an IPS Ivocolor Shade material shade guide.

Delivery forms

IPS Ivocolor® Shade Kit	667651
IPS Ivocolor Shade Dentin, shades: SD0, SD1, SD2, SD3, SD4, SD5, SD6, SD7, SD8	1 x 3 g each
IPS Ivocolor Shade Incisal, shades: SI1, SI2, SI3	1 x 3 g each
IPS Ivocolor Glaze Paste	1 x 3 g
IPS Ivocolor Glaze Paste FLUO	1 x 3 g
IPS Ivocolor Mixing Liquid (allround)	1 x 15 ml
IPS Ivocolor Mixing Liquid (longlife)	1 x 15 ml
IPS Ivocolor Shade Guide Dentin/Incisal	1x

IPS Ivocolor® Essence

IPS Ivocolor® Essence consists of 23 shade powders that are used for adjusting the brightness of layering materials, for shade characterizations in the layering technique and for surface characterizations when using IPS ceramic materials. The powders exhibit varying levels of fluorescence, depending on their shade.

Delivery forms

IPS Ivocolor® Glaze Paste	1 x 3 g	667690
	1 x 9 g	667691
IPS Ivocolor® Glaze Paste FLUO	1 x 3 g	667692
	1 x 9 g	667693

IPS Ivocolor® Mixing Liquids

The IPS Ivocolor® Mixing Liquids are suitable for mixing and diluting all IPS Ivocolor powder and paste materials.

- ✓ **IPS Ivocolor Mixing Liquid allround** has a low viscosity. Mixed powders remain applicable for a limited period of time (approx. ½ day).
- ✓ **IPS Ivocolor Mixing Liquid longlife** produces a higher viscosity and remains applicable for a longer period of time (approx. 1 week).

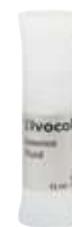

Delivery forms

IPS Ivocolor® Mixing Liquid allround	1 x 15 ml	667694
IPS Ivocolor® Mixing Liquid longlife	1 x 15 ml	667695

IPS Ivocolor® Essence Fluid

IPS Ivocolor® Essence Fluid is only suitable for mixing IPS Ivocolor Essence materials. Mixing the shade powders with IPS Ivocolor Essence Fluid results in a paste-like consistency.

Delivery forms

IPS Ivocolor® Essence Fluid	1 x 15 ml	667696

Delivery forms

IPS Ivocolor® Shade Guide Dentin/Incisal	1 x	668544
IPS Ivocolor® Shade Guide Essence	1 x	668575

Press ceramics

IPS e.max® Press

IPS e.max® Press is the clinically proven, reliable and versatile lithium disilicate press ceramic. It combines high strength and natural esthetics with efficient processing, making it the ideal solution for demanding restorations in both digital and analog workflows.

IPS e.max Press is used for the fabrication of highly esthetic single-tooth restorations (veneers, inlays, onlays, crowns), bridges in the anterior and premolar region as well as for hybrid abutments and hybrid abutment crowns. The material excels in terms of light dynamics and precise fit.

The press ingots are available in five translucency levels (HT, MT, LT, MO, HO) and as Impulse ingots. Polychromatic Multi ingots are also available. Monochromatic and Impulse ingots are available in two sizes, Multi ingots in one size.

The IPS e.max Press Multi ingot delivers outstanding esthetics in just one step. The integrated progression of shade and translucency results in restorations with a highly natural transition from dentin to incisal, without requiring an additional layering step. IPS e.max Press Multi produces efficient, reproducible results with impressive esthetics, particularly in anterior restorations.

IPS e.max Press can be seamlessly integrated into digital workflows via the Digital Press Design workflow. This approach combines the precision of CAD-based design with the proven benefits of press technology. The burnout wax pattern is milled from a wax disc or fabricated by means of 3D printing, significantly reducing manual working steps in the dental laboratory.

The subsequent processing is carried out using the conventional press technique in a Programat press furnace. IPS Ivocolor, IPS e.max Ceram Art or IPS e.max Ceram can be used for individual characterization or layering. This offers the ideal balance of efficiency, function and esthetics – for high-quality all-ceramic solutions made from lithium disilicate.

IPS e.max® Press Multi (polychromatic) ingots

Multi ingots are ideal for esthetic veneers and crowns with a natural shade progression from dentin to incisal. They are available in Bleach BL as well as A–D shades.

IPS e.max® Press LT (Low Translucency) ingots

Due to their lower translucency, LT ingots are suitable for larger restorations (e.g. posterior crowns) and impress with natural brightness and chroma. They are available in 16 A–D shades and 4 Bleach shades.

IPS e.max® Press Invex Liquid

IPS e.max Press Invex Liquid is used for removing the surface reaction layer.

Delivery forms

IPS e.max® Press Invex Liquid	1 x 1 l	597064
IPS e.max® Press Invex jar (empty)	1x	628336

IPS e.max® Press / IPS e.max® CAD material shade guide

The shade guides for the ceramic press and CAD materials facilitate the shade matching procedure. The shade guides and the individual shade tabs can be sterilized in an autoclave to prevent cross-contamination in the oral cavity. The shade tabs show the final shade, i.e. the shade of the material after the pressing or crystallization process. In this way, they can be used to check the shade and the quality of the crystallization process when using IPS e.max® CAD.

Delivery forms

CAD/CAM blocks

IPS e.max® CAD

Lithium disilicate glass-ceramics (LS₂)

IPS e.max® CAD is the best-selling glass-ceramic^[1] worldwide. The material enables the efficient fabrication of full-contour restorations. It is distinguished by its flexibility, versatile field of applications and processing options and its high strength of 530 MPa.^[2]

Both its esthetic properties and durability have been confirmed in everyday clinical practice.^[3-5]

Processing options:

"Blue" restorations can be:

- polished and crystallized
- glazed and crystallized in a single step
- stained, glazed and crystallized in a single step

Types of restorations:

- Minimally invasive crowns (1 mm)^[6]
- crowns
- Three-unit bridges (up to the second premolar as the terminal abutment)
- Implant-supported hybrid abutment restorations (hybrid abutments^[7], hybrid abutment crowns)
- Veneers and occlusal veneers
- Inlays, onlays, partial crowns

Benefits:

- ✓ Excellent esthetics and high flexural strength of 530 MPa^[2]
- ✓ 95.2% average survival rate over a period of 15 years^[8]
- ✓ Efficient grinding of posterior crowns in only 08:07 minutes^[9]
- ✓ Speed crystallization in 11:10 minutes in the Programat® CS6^[10] or approx. 14:10 minutes in the CEREC® SpeedFire^[10]
- ✓ Broad spectrum of restorations for your chairside CAD/CAM applications
- ✓ 10-year guarantee
- ✓ Suitable for conventional, adhesive or self-adhesive cementation techniques

Block sizes^[7]:

- 6 (I12, C14, C16, B32, B40 and B40L) and 2 abutment block sizes (A14, A16)

Translucency levels^[7]:

- 4 levels and 2 Impulse blocks (HT – High Translucency, MT – Medium Translucency, LT – Low Translucency, MO – Medium Opacity)

Shades^[7]:

- Comprehensive range of shades: in A–D and BL shades (the range of shades varies depending on the translucency level), see page 128-133.

Translucency level 

Given their high translucency, HT blocks are ideally suited for the fabrication of small restorations (e.g. inlays, onlays). Restorations made from HT blocks demonstrate high translucency and are used for restorations that require more brightness than MT restorations and more natural appearance than LT restorations.

IPS e.max® ZirCAD

Zirconium oxide ceramics (ZrO₂)

IPS e.max ZirCAD allows dental professionals to produce esthetic, monolithic zirconia restorations efficiently in the dental practice with the help of efficient speed sintering programs.

Two groups of materials combined into one – this is what makes IPS e.max ZirCAD MT Multi special: translucent 5Y-TZP zirconium oxide provides high translucency for the incisal zone and the more opaque 4Y-TZP zirconium oxide provides high stability in the dentin zone.

In addition, the material features a gradual progression of shade and translucency, consisting of 60% dentin, 20% transition and 20% incisal zone. This distribution reflects the natural progression from dentin to incisal and imparts natural esthetic appearance to the restorations, even if no characterizations are applied.^[3]

Processing options:

After the sintering procedure, restorations can be

- glazed and fired
- optionally: stained, glazed and fired
- polished

Types of restorations:

- Crowns
- Three-unit bridges

Benefits:

- ✓ High strengths of 1200 MPa (LT^[1]) and 850 MPa (MT Multi^[2]) allow reduced wall thicknesses and conservative preparation methods.
- ✓ Natural progression of shade and translucency deliver true-to-nature esthetic results in conjunction with MT Multi^[3]
- ✓ Natural fluorescence can be achieved with IPS e.max CAD Crystall./Glaze Fluo paste^[3]
- ✓ Conventional, adhesive or self-adhesive cementation

Block sizes:

- 2 (C17 and B45)

Translucency levels:

- LT (Low Translucency) and MT Multi (Medium Translucency)

Shades:

- 8 (BL or BL1, A1, A2, A3, B1, B2, C2, D2)

Authorized CAD/CAM systems:

- ✓ **Dentsply Sirona:**
 - inLab® MC XL
 - CEREC® MC / MC X / MC XL / Primemill
- ✓ **Planmeca:**
 - PlanMill® 30 S / 40 / 40 S

IPS Empress® CAD

Leucite glass-ceramics

IPS Empress CAD restorations have been in clinical use for decades. Due to the pronounced chameleon effect and natural fluorescence^[1] the material faithfully mimics the natural appearance of teeth.

IPS Empress CAD is known for exceptional esthetics and can be polished to a high gloss quickly and easily: grind – polish – done.

The innovative polychromatic IPS Empress CAD Multi A2 block is a special highlight in this range. The block features a natural progression of shade and fluorescence from dentin to incisal.^[1]

Processing options:

After the grinding process, the restorations can be:

- polished
- optionally: stained, glazed

Types of restorations:

- Crowns
- Inlays, onlays, partial crowns
- Veneers

Benefits:

- ✓ Highly esthetic restorations, efficiently created
- ✓ Material with a flexural strength of 185 MPa^[2] that has been in clinical use for decades
- ✓ Optimum adjustment to the natural tooth structure due to the chameleon effect

Block sizes:

- 4 (I10, I12, C14, C14 L)

Translucency levels:

- 2 and Multi block (HT – High Translucency, LT – Low Translucency)

Shades:

- Comprehensive range of shades: available in A–D and BL shades (the range of shades varies depending on the translucency level and block size) see page 137

Tetric® CAD

Composite

Tetric CAD is an esthetic composite block for the efficient fabrication of single-tooth restorations (flexural strength: 272 MPa^[1]).

Due to the pronounced chameleon effect, Tetric CAD restorations blend in with the residual tooth structure in an optically pleasing manner.^[2]

The restoration is polished after milling and then seated using an adhesive cementation protocol. This processing technique is very efficient and leads to an esthetic result quickly and easily.

Processing options:

After the grinding process, the restorations can be:

- polished
- optionally: characterized

Types of restorations:

- Veneers
- Inlays
- Onlays (e.g. occlusal veneers, partial crowns)
- Crowns

Benefits:

- ✓ Natural integration into the oral environment due to the unique chameleon effect^[2]
- ✓ Excellent polishability and intraoral repairability
- ✓ Easy and efficient processing
- ✓ Stability in limited layer thicknesses; restorations with thinly tapered margins possible
- ✓ Durable bond due to coordinated luting system

Block sizes:

- C14

Translucency levels:

- 2 (HT – High Translucency, MT – Medium Translucency)

Shades:

- 5 (BL, A1, A2, A3, A3.5; the shade offering varies, depending on the translucency level)

Authorized CAD/CAM systems:

- ✓ **Ivoclar:**
 - PrograMill® PM3 / PM5 / PM7 / One

Telio® CAD

Cross-linked PMMA material

Telio CAD are cross-linked PMMA blocks for the efficient fabrication of long-term temporaries (flexural strength: 135 MPa^[1]).

As a result of an optimized manufacturing process, the restorations feature a smooth surface that can be quickly and efficiently polished.

Processing options:

After the milling process, the restorations can be

- polished
- optionally: characterized

Types of restorations:

- Temporary crowns
- Temporary bridges with up to two connected pontics
- Implant-supported temporary hybrid abutment crowns

Benefits:

- ✓ High material homogeneity and process reliability result in fewer mixing errors and air entrapments compared with conventional methods
- ✓ Durable shade stability and lifelike fluorescence^[2]
- ✓ Excellent polishability
- ✓ Economical fabrication of temporaries

Block sizes^[4]:

Implant prosthetics

From temporary to permanent restoration

The IPS e.max® CAD and Telio® CAD blocks feature a pre-fabricated interface to facilitate direct cementation to a titanium bonding base. So, implant-supported hybrid abutments and hybrid abutment crowns can be created at chairside using clinically proven products.^[1-4]

Cementation is achieved with the self-curing Multilink® Hybrid Abutment luting composite.

Types of restorations:

- **Telio CAD**
Implant-supported temporary hybrid abutment crowns
- **IPS e.max CAD**
Implant-supported hybrid solutions (hybrid abutments, hybrid abutment crowns)^[4]

Benefits:

- **Telio CAD**
 - ✓ Straightforward design of the emergence profile^[3,4]
 - ✓ Visualization of the permanent prosthetic solution
- **IPS e.max CAD^[4]**
 - ✓ Esthetic restoration due to tooth-coloured hybrid abutments
 - ✓ Hybrid abutment crown (2-in-1) offers functionality and efficiency^[1,3]
 - ✓ Good biocompatibility with oral soft tissues^[1]

Block sizes:

- 2 (A14 and A16) and 2 interface sizes

Multilink® Hybrid Abutment

Multilink® Hybrid Abutment is a self-curing luting composite for the permanent cementation of lithium disilicate (LS₂) glass-ceramic and zirconium oxide ceramic structures on implant sleeves made of titanium/titanium alloy and zirconium oxide.

Area of application:

Extraoral cementation of lithium disilicate (LS₂) glass-ceramic and zirconium oxide ceramic structures (abutments and abutment crowns) on implant sleeves made of titanium/titanium alloy and zirconium oxide.

Benefits:

- ✓ High bonding strength for a reliable cementation
- ✓ Straightforward handling due to the convenient automix syringe

Shades:

Accessories

IPS® Object Fix Flow / IPS® Object Putty

Auxiliary firing pastes with varying viscosity to support all-ceramic restorations (especially IPS e.max® CAD) during firing and crystallization. The pastes are used to stabilize and secure the restorations on the silicon nitride support pins or directly on the silicon nitride firing tray. The pastes are easy to apply and remove after the firing procedure.

Delivery forms

IPS® Object Fix Flow	1 x 10 ml	605525
IPS® Object Fix Putty	1 x 10 g	605526

IPS e.max® CAD Crystallization Tray / IPS Speed Tray

The IPS e.max® CAD Crystallization Tray is a firing tray for the crystallization of IPS e.max CAD restorations as well as for the stains and/or glaze firing of IPS Empress® CAD, IPS e.max CAD and IPS e.max ZirCAD restorations with the IPS e.max CAD Crystall./materials.

The IPS Speed Tray is required for the speed crystallization of IPS e.max CAD.

To carry out the firing, the restorations are placed on the IPS e.max CAD Crystallization Pins supplied with the tray.

Area of application:

- IPS e.max CAD
- IPS e.max ZirCAD
- IPS Empress CAD

Sizes:

2

Delivery forms

IPS e.max® CAD Crystallization Tray Kit		767467
IPS e.max CAD Crystallisation Tray	1 x	
IPS e.max CAD Crystallization Pin (sizes: 1, 2, 3)	3 x each

IPS e.max CAD Crystallization Pin (sizes: 1, 2, 3)	1 x each	
IPS e.max® CAD Crystallization Pin Refill		
1 / 2 / 3	6 x each	759428

OptraGloss® Extra Oral

OptraGloss® Extra Oral is a universal two-step polishing system for extraoral use, which can be supplemented with an optional polishing paste. In just a few minutes, unpolished restorations can be polished to a high gloss. The polishers are ideal for finishing oxide ceramics and glass-ceramics, such as IPS e.max ZirCAD Prime, IPS e.max CAD, IPS Empress CAD und PMMA such as e.g. Telio CAD and Compositen such as e.g. Tetric CAD.

Shapes:

- Disc
- Flame
- Spiral Wheel

Areas of application:

For polishing zirconium oxide (e.g. IPS e.max ZirCAD Prime) and glass-ceramics (e.g. IPS e.max CAD, IPS Empress CAD):

- Step 1: Pre-polishing with OptraGloss Extra Oral PP (dark blue).
- Step 2: High-gloss polishing with OptraGloss Extra Oral HP (light blue)
- Optional: Polishing with OptraGloss Extra Oral Polishing Paste together with a goat-hair brush.
- Use only light blue polishers for polishing PMMA (e.g. Tetric CAD) or composites (e.g. Tetric CAD)

Benefits:

- ✓ Suitable for oxide and glass-ceramics – zirconium oxide in the sintered or non-sintered state as well as lithium disilicate before or after crystallization – as well as for PMMA and composites
- ✓ Easy and efficient application
- ✓ Cost-effective due to long service life and additional time savings in the workflow

Universal stains and glazes

IPS e.max® CAD Crystall./Shades/Stains and Glaze

Universal range of stains and glazes

IPS e.max® CAD Crystall./Shades, Stains and Glaze is a universal range of stains and glazes designed for use with IPS e.max CAD, IPS e.max ZirCAD and IPS Empress® CAD.

The glazing paste is available as a variant with and without a fluorescent effect.^[1]

Minor corrections (e.g. proximal contact areas) can be applied to IPS e.max CAD and IPS e.max ZirCAD restorations using IPS e.max CAD Crystall./Add-On.

Types of restorations:

- IPS e.max CAD
- IPS e.max ZirCAD
- IPS Empress CAD

Benefits:

- ✓ Reduced stock, lower costs – a single range suitable for all CAD/CAM chairside ceramics from Ivoclar
- ✓ Familiar application methods and consistently high quality
- ✓ Glazing paste with and without a fluorescent effect ^[1]
- ✓ Possibility of making corrections (e.g. proximal contact areas) using Add-On material

Shades:

- 7 shades (0, 1, 2, 3, 4, Incisal 1, Incisal 2)
- 7 stains (white, cream, sunset, copper, olive, khaki, mahogany)

CAD/CAM discs

Fixed denture prosthetics

IPS e.max® ZirCAD

IPS e.max ZirCAD provides a versatile range of zirconium oxide materials for labside CAD/CAM applications. It is used for the fabrication of frameworks and full-contour crowns and bridges. High strength, thin wall thickness and high esthetics are among its hallmarks.

IPS e.max ZirCAD Prime is redefining all-ceramics. This revolutionary material is characterized by exceptional quality and esthetics. The product is suitable for any indication – from single crowns to multiple-unit bridges and accommodates all processing techniques.

After dry milling in a PrograMill CAD/CAM machine, the non-shaded restorations can be optionally infiltrated with colouring liquids. IPS e.max ZirCAD is sintered in a e.g. Programat S2 sinter furnace and finished with IPS Ivocolor and/or IPS e.max Ceram or IPS e.max Ceram Art for final characterization.

GT Technology

The new unique GT Technology is at the core of IPS e.max® ZirCAD® Prime.

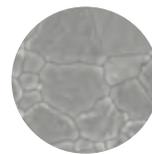

This technology involves three innovative processing steps which allow the raw materials 3Y-TZP und 5Y-PSZ (Prime) / 4Y-TZP and 5Y-PSZ (Prime Esthetic) to be combined in order to produce the exceptional properties of this revolutionary material.

Incisal zone

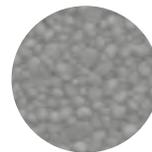

Transition zone

Dentin zone

5Y-PSZ

Highly translucent conditioned zirconium oxide in the incisal zone
650 MPa

3Y-TZP

Very strong conditioned zirconium oxide in the dentin zone
1200 MPa

IPS e.max® ZirCAD Colouring Liquid

IPS e.max ZirCAD Colouring Liquids are ready-to-use aqueous metal salt solutions for staining unsintered restorations made of IPS e.max ZirCAD MT BL or LT and IPS e.max ZirCAD Prime using the brush infiltration technique.

IPS e.max ZirCAD Colouring Liquid Indicator is a colour concentrate that is available in the colours red, blue and yellow. They are mixed with the IPS e.max ZirCAD Colouring Liquids to render the infiltration of zirconium oxide restorations visible and check the shade before sintering. This makes it easier to achieve reproducible shade results.

IPS e.max ZirCAD Colouring Liquid Diluter is used to dilute the IPS e.max ZirCAD Colouring Liquids. They assist in lowering the staining effect of the colouring liquids to achieve lighter shades.

IPS® Natural Die Material

The **IPS Natural Die Material shade guide** is used for determining the shade of the tooth structure after preparation. The shade is selected on the basis of the largest, most severely discoloured part of the prepared tooth.

IPS Natural Die Material allows users to fabricate a customized model die with which they can accurately select the shade and brightness of the all-ceramic restorations.

Indication:

Selecting the preparation shade after tooth preparation

Benefits:

- ✓ Easy and accurate reproduction of shades due to having determined the preparation shade
- ✓ Fabrication of a customized model die
- ✓ Autoclavable shade guide

Shades:

9 (ND 1, ND 2, ND 3, ND 4, ND 5, ND 6, ND 7, ND 8, ND 9)

Telio® CAD

Telio CAD discs are made from a highly cross-linked PMMA material. They are used for the digital fabrication of temporary crowns, bridges and hybrid abutment crowns (Telio CAD Monolithic Solutions, Telio CAD Abutment Solutions).

The material is highly homogeneous and easy to process as a result of an industrial polymerization process. Polishing is all that is needed to get the restorations ready for placing. Optionally, they can be customized using the stains and layering materials of the SR Nexco® range of light-curing lab composites.

Removable prosthetics

Ivotion®

The new monolithic disc for the CAD/CAM technique combines both tooth and denture base material in a single disc and offers an astonishing level of efficiency due to the unique Shell Geometry. Complete dentures are milled from one disc in one milling process and with only a few manual working steps.

This is in accordance with the product slogan:
One disc. One denture.

Ivotion® Dent

The Ivotion Dent discs are made of tooth-coloured, monochromatic DCL material.

They impress with an optimal level of translucency and lifelike fluorescence. Three essential factors are responsible for the highly esthetic results they deliver: low opacity in combination with the anatomic shape of the anterior teeth and a natural-looking surface texture.

Ivotion Dent Multi discs are made of polychromatic DCL material.

With the innovative Pearl Structure Effect, a harmonious shade progression is achieved, which imparts the denture teeth with high esthetics. The polychromatic discs were developed with three layers in accordance with the natural model: incisal - dentin - cervical.

Dentures made of Ivotion Dent Multi are ready to use; time-consuming characterizations are no longer necessary.

Ivotion® Base

The Ivotion Base discs are made of high-impact strength denture base material for the CAD/CAM technique. They are used to manufacture denture bases for digital removable dentures using milling technology. The industrial manufacturing process results in a homogeneous material quality.

The 30-mm thick Ivotion Base discs are available in the basic shades of Pink, Pink-V, Preference, 34-V and US-D.

Ivotion® Bond

Ivotion Bond is a self-curing two-component system on PMMA basis. The material is used for the permanent bonding of prefabricated or CAD/CAM-fabricated teeth and tooth segments to a denture base made of Ivotion Base.

Ivotion Bond is available in a pink-coloured universal shade and is supplied in a kit. Practical pre-dosing is sufficient for ten dentures and enables clean working.

Delivery forms

Ivotion® Bond Kit		742011
Ivotion CAD Bond polymer	10 x 1.75 g	
Ivotion CAD Bond monomer	10 x 1.9 ml	
Ivotion CAD Bond modelling liquid	5 ml

Process-supporting

ProArt CAD

The ProArt CAD discs are made of dimensionally stable synthetic material and are easy to process in a dental mill. As CAD/CAM auxiliary materials, they cover a wide range of applications.

Delivery forms

ProArt CAD Splint	clear	1 disc
∅ 98.5/16 mm		686318
∅ 98.5/20 mm		686319
ProArt CAD Try-In	white	1 disc
∅ 98.5/30 mm		686180

ProArt CAD Wax yellow

The wax discs are made of dimensionally stable wax that is easy to mill. The discs enable the digital implementation of analog laboratory processes. The milled objects offer a smooth surface, precise fit and residue-free burnout for perfect press results with IPS e.max Press.

Delivery forms

ProArt CAD Wax	yellow	1 disc
∅ 98.5/16 mm		686320
∅ 98.5/20 mm		686321

Cementation

IPS® Ceramic etching gel

The IPS® Ceramic etching gel is used for the creation of retentive bonding surfaces on all-ceramic restorations to prepare for cementation. It enhances the bonding effect between the composite cement and the ceramic bonding surface.

Delivery forms

IPS® Ceramic Etching Gel Kit		531550
IPS Ceramic etching gel	1 x 5 ml	
Neutralization powder	1 x 30 g	
Measuring spoon	1x	

Refill

IPS Ceramic etching gel	1 x 5 ml	531548
Neutralization powder	1 x 30 g	531549

Monobond® Plus

Monobond® Plus is a universal single-component primer promoting an adhesive bond between luting composites (e.g. the Variolink® and Multilink® product lines) and all indirect restorative materials (glass-ceramics, oxide-ceramics, metal, composites, fiber-reinforced composites).

Delivery forms

Monobond® Plus can be ordered directly from a Clinical Depot.

Monobond Etch & Prime®

Monobond Etch & Prime® is a single-component ceramic primer that etches and silanates **glass-ceramic surfaces** in one easy step.

Delivery forms

Monobond Etch & Prime® can be ordered directly from a Clinical Depot.

Total Etch

Total Etch is used to condition the preparation for the adhesive cementation of IPS Empress® CAD restorations. It is an etching gel containing 37% phosphoric acid for enamel etching and dentin conditioning in conjunction with the adhesive luting of all-ceramic restorations.

Delivery forms

Total Etch can be ordered directly from a Clinical Depot.

Adhese® Universal

The universal adhesive

Adhese® Universal is a light-curing single-component adhesive for direct and indirect bonding procedures. It features compatibility with all etching techniques: self-etch, selective-enamel-etch or total-etch. Adhese Universal is available in the unique VivaPen® delivery form for fast and convenient direct intraoral application, helping users minimize waste and optimize cost-effectiveness.

Delivery forms

Adhese® Universal can be ordered directly from a Clinical Depot.

Syntac® and Heliobond

Syntac® is a tried-and-tested multi-component adhesive. The adhesive bond between the enamel and dentin is achieved by the consecutive application of Syntac Primer, Syntac Adhesive and Heliobond.

Delivery forms

Syntac® and Heliobond can be ordered directly from a Clinical Depot.

Variolink® Esthetic

Variolink® Esthetic is a versatile and esthetic light- and dual-curing luting composite for the permanent placement of all types of restorations and materials.

Delivery forms

Variolink® Esthetic can be ordered directly from a Clinical Depot.

Multilink® Automix

Self-curing luting composite with light-curing option for the adhesive cementation of indirect restorations made of metal, all-ceramics, metal-ceramics and composite materials.

Delivery forms

Multilink® Automix can be ordered directly from a Clinical Depot.

Multilink® Hybrid Abutment

Self-curing luting composite for the permanent cementation of lithium disilicate (LS₂) glass-ceramic and zirconium oxide ceramic structures on implant sleeves made of titanium/titanium alloy and zirconium oxide.

Delivery forms

Multilink® Hybrid Abutment can be ordered directly from a Clinical Depot.

Speedcem® Plus

Self-adhesive, self-curing resin cement with light-curing option for the cementation of restorations made of zirconium oxide and metal-ceramics and for the cementation of restorations on implant abutments.

Delivery forms

Speedcem® Plus can be ordered directly from a Clinical Depot.

Ceramic, press and sinter furnaces

Programat® P710 G2

Programat® P710 G2 is the premium furnace of the Programat family and distinguishes itself with its innovative technology and exclusive design. The use of intelligent infrared technology significantly heightens the process reliability. An integrated infrared thermal imaging camera automatically controls the pre-drying and closing process.

The Programat P710 G2 is operated via a large 7-inch colour touchscreen that features an enhanced user interface and the proven membrane-sealed keypad.

The furnace is equipped with numerous Ivoclar programs, which are coordinated with materials such as IPS e.max®, IPS Style®, IPS InLine® and IPS Empress®, to ensure immediate use of the furnace without programming. In addition to the programs already installed, 700 individually adjustable programs are available.

Technical data

Voltage	110–120 V / 50–60 Hz 200–240 V / 50–60 Hz
Dimensions (closed)	Depth: 495 mm Width: 320/395 mm (with cooling tray) Height: 320 mm
Firing chamber:	ø 90 mm Height: 80 mm
Max. firing temperature:	1200 °C / 2192 °F

Programat® P510 G2

The Programat® P510 G2 combines high-tech and modern design in a highly efficient and user-friendly furnace. The intelligent Programat infrared technology speeds up the firing process by up to 20 per cent and enhances the quality of the firing results, irrespective of the size or the number of restorations in the firing chamber. The new thermal imaging camera automatically controls the pre-drying and closing process.

The Programat P510 G2 is operated via the large 7-inch colour touchscreen that features an enhanced user interface and the proven membrane-sealed keypad.

The furnace is equipped with numerous Ivoclar programs, which are coordinated with materials such as IPS e.max®, IPS Style®, IPS InLine® and IPS Empress®, to ensure immediate use of the furnace without programming. Programat® P310 G2

With its compact design, the Programat® P310 G2 focuses on the essential and is the ideal furnace for everyday tasks in the dental lab.

Operation is intuitive and easy thanks to the colour touchscreen, the large icons on the user interface and the membrane-sealed keypad.

The furnace is equipped with programs that are coordinated with materials such as IPS e.max®, IPS Style®, IPS InLine® and IPS Empress® to ensure immediate use of the program without programming. In addition to the programs already installed, 300 individually adjustable programs are available.

VP5 vacuum pump

The high-performance VP5 vacuum pump has been especially developed for the Ivoclar ceramic and press furnaces. The pump features a very high delivery rate. In addition, it is characterized by a distinct design and a carrying handle for convenient relocation.

Technical data

Voltage	220–240 V / 50–60 Hz
	200 V / 50–60 Hz
	115 V / 50–60 Hz
	100 V / 50–60 Hz
Power consumption	80 Watt
Final vacuum	approx. 20 mbar

Delivery forms

VP5 vacuum pump (white)	230 V/ 50–60 Hz*	666308
VP5 vacuum pump		1x
Sound absorber		1x
Vacuum Pump Filter Kit		1x
* other voltage versions available		

VP3 easy vacuum pump

The small and light-weight VP3 easy vacuum pump is suitable for the evacuation of the firing chamber of the Ivoclar ceramic furnaces. This vacuum pump is not suitable for press furnaces.

The VP3 is a diaphragm pump that is characterized by low weight and extremely small dimensions.

Technical data

Voltage	230 V / 50–60 Hz
	200 V / 50–60 Hz
	115 V / 50–60 Hz
Power consumption	70 Watt
Dimensions	W 140 x H 130 x D 210 mm
Final vacuum	approx. 40 mbar

Vacuum Pump Filter Kit	1x
Vacuum hose 200 mm	1x

Programat® Firing Tray Kit 2

The Firing Tray Kit 2 was specially developed for the Programat® furnaces. The support pins can be individually mounted on the firing tray as required.

Delivery forms

Programat® Firing Tray Kit 2	655946
Firing tray	2x
Support pin A	6x
Support pin B	6x
Fan pin	2x
Ceramic sleeve	2x
Hobbyceram pin	1x

Metal pins for firing tray

The metal support pins can be used for the Programat® firing tray and can be mounted on the honeycomb firing tray as required.

Delivery forms

	626098
Metal pin A	4x
Metal pins B	4x
Metal pins C	4x

Ceramic sleeves for metal pins

The ceramic sleeves can be placed on the metal pins to prevent metal-free restorations from coming into direct contact with the metal pins.

Delivery forms

Ceramic sleeve for metal pins refill	666068
Ceramic sleeve	10x

Temperature checking set 2

The temperature checking set is used to check and adjust the temperature in the Programat furnace chamber (for Programat® P200, P300, P310, including Programat G2 devices, Programat X1, etc.).

Delivery forms

Temperature checking set 2		544903
Sample holder	2x	
Silver test wires	10x	

Silver test wires

Refill package containing 5 silver test wires for the temperature checking set 2.

Delivery forms

Silver test wires refill	5x	545634
--------------------------	----	--------

Automatic Temperature Checking Set ATK 2

The Automatic Temperature Checking set ATK2 is used to check and adjust the firing temperatures in furnaces with automatic calibration programs for the ATK2 system (e.g. Programat® P500, P510, P700, P710, CS, CS2, CS3, EP 3000, EP 3010, EP 5000, EP 5010 including Programat G2 devices).

The simultaneous double-range calibration is a special feature of the ATK2.

Delivery forms

Automatic Temperature Checking Set ATK 2		598833
ATK2 sample	5x	

Firing tongs

These firing tongs are used to place objects in the firing chamber. High precision and excellent material quality are the special features of these tongs.

Delivery forms

Firing tongs	1x	530665
--------------	----	--------

Programat® tong holder

The Programat® tong holder can be mounted to the Programat housing and provides convenient placement of the firing tongs.

---	----	--------

Programat® WLAN Kit

The WLAN Kit is used for the wireless data transfer (e.g. for Programat® CS3, P510, EP 5010, incl. Programat G2 devices).

Delivery forms

Programat® WLAN Kit	1x	655949
---------------------	----	--------

Programat® WLAN / Bluetooth Kit

This kit comprises a WLAN flash drive for wireless data transfer and a Bluetooth flash drive to enable the hands-free phone function (e.g. for Programat® P710, P710 G2).

Delivery forms

Programat® WLAN / Bluetooth Kit	1x	679915
---------------------------------	----	--------

Digital Shade Assistant starter kit

The Digital Shade Assistant starter kit is designed specifically to help users get started in digital shade selection and includes the components required for this. The Digital Shade Assistant holder provides convenient placement of the shade guide teeth.

Delivery forms

Digital Shade starter kit		679917
Digital Shade Assistant holder	3x	
A-D shade guide	1x	

Digital Shade Assistant holder kit

The Digital Shade Assistant holder provides placement of the shade guide teeth for the DSA function.

Delivery forms

Digital Shade Assistant holder kit		679916
Digital Shade Assistant holder	2x	

Programat® EP 5010 G2

The Programat® EP 5010 G2 is a premium combination furnace that can be used as both a press and ceramic furnace. This highly innovative, efficient and user-friendly furnace optimally combines advanced technology and design.

The Programat infrared technology measures the exact temperature at the surface of the objects being fired or the investment ring and so opens up a multitude of new possibilities to enhance the comfort, reliability and efficiency of the process.

Pressing is now even easier and more economical thanks to the fully automatic press function (FPF): Simply put the investment ring into the furnace and press the start button – everything else is performed by the furnace itself.

The integrated crack detection system (CDS) interrupts the pressing process as soon as it detects a crack in the investment ring. This ensures that the restorations are optimally protected.

In addition to a wide array of Ivoclar programs that are especially coordinated with materials such as IPS e.max® Press, the furnace provides space for 500 individual firing programs and 20 individual press programs.

Technical data

Voltage	110 – 120 V/50 – 60 Hz 200 – 240 V/50 – 60 Hz
Dimensions (closed)	Depth: 495 mm Width: 320/395 mm (with cooling tray) Height: 550 mm

Programat® EP 3010 G2

The Programat® EP 3010 G2 is a compact combination furnace that can be used as both a press and ceramic furnace. The furnace enables economic efficiency and delivers high-quality press and firing results. The device is optimally coordinated with Ivoclar's press ceramic products such as IPS e.max Press.

Pressing is now even easier and more economical thanks to the fully automatic press function (FPF): Simply put the investment ring into the furnace and press the start button – everything else is performed by the furnace itself.

The integrated crack detection system (CDS) interrupts the pressing process as soon as it detects a crack in the investment ring. This ensures that the restorations are optimally protected.

Investment ring cooling grid

The investment ring cooling grid has been especially developed for use in conjunction with press ceramic materials, such as IPS e.max® Press. It allows investment rings to safely cool to room temperature. This way, thermal stresses in the investment ring can be avoided.

Programat® S2

The Programat® S2 is a compact sinter furnace suitable for sintering IPS e.max ZirCAD and other zirconium oxide materials. The tried-and-tested sintering chamber ensures optimum sintering processes with up to a temperature of 1600 °C / 2912 °F. For IPS e.max ZirCAD and Zenostar, standard and speed sintering programs are pre-installed on the furnace. Individual programs are easy to set up due to the intuitive user interface and the large 7-inch colour touchscreen. The OSD keeps users informed on the operational status of the furnace, or the progress of the running sintering programs, by displaying various colours that can be clearly seen even from a distance. The sinter tray can be ideally positioned on the large cooling tray. The Programat Dosto tray increases the loading capacity of the Programat S2 by up to 40% (except for speed sintering programs). Sintering has only just become more efficient.

Benefits:

- ✓ Sintering processes with temperatures up to 1600 °C / 2912 °F
- ✓ Sintering of single-tooth frameworks in 75 minutes and bridge frameworks in 90 minutes
- ✓ Integrated speed sintering programs for full-contour restorations with higher translucency
- ✓ Up to 40% more loading capacity with the Programat Dosto Tray
- ✓ Easy and intuitive to operate
- ✓ Power saving technology
- ✓ Compact design and weight of only 27 kg
- ✓ Can be calibrated
- ✓ OSD (Optical Status Display)

Lab scanners and software

Scanning in new dimensions

What all our lab scanners have in common: They offer an almost complete degree of automation, easy and safe handling as well as high precision and true-to-detail scan results. All our scanners have been designed to meet the specific requirements of everyday lab work. They seamlessly integrate into the digital workflows from Ivoclar to facilitate daily laboratory routines. Used in combination with the proven exocad DentalCAD software, they offer various application options. Choose the lab scanner that best suits your individual needs.

Step 1: Choose your PrograScan lab scanner

PrograScan PS7

Simultaneous high speed for perfection

Our new high-end lab scanner captures upper and lower jaw models simultaneously. Short scan times and minimum user interaction help you maximize your efficiency in your everyday laboratory work.

- ✓ 1-year warranty on scanner hardware
- ✓ Optional warranty extension by additional 3 years
- ✓ PrograScan scan software included

Features:

- ✓ 1 click from start of the scan to the 3D model which is available in the CAD software in just 2 minutes
- ✓ 2 scan tables for simultaneous capturing of upper and lower jaw models
- ✓ 8 cameras
- ✓ White light LED
- ✓ Accuracy of 5 micrometres (ISO 12836)
- ✓ Texture scanning (colour texture)
- ✓ Digital articulator capturing for a maximum degree of automation (optional accessories)
- ✓ Automatic recognition of accessories and auto-start feature

Delivery forms

PrograScan PS5

Precision scans and versatile functions

High scan speed is the hallmark of the PrograScan PS5. This lets you complete your work process in significantly less time. Impressions are scanned fully automatically using a third axis. The scans are shown in colour.

- ✓ 1-year warranty on scanner hardware
- ✓ Optional warranty extension by additional 3 years
- ✓ PrograScan scan software included

Features:

- ✓ 1 scan table
- ✓ 4 cameras
- ✓ White light LED
- ✓ Accuracy of 5 micrometres (ISO 12836)
- ✓ Texture scanning (colour texture)
- ✓ Digital articulator capturing for a maximum degree of automization (optional accessories)
- ✓ Automatic recognition of accessories and auto-start feature

Dental CAD add-on applications

You can extend the exocad DentalCAD bundles with add-on modules to meet your individual requirements. The versatile add-on modules from exocad offer additional features that allow you to expand your offering with new services. This modular system offers maximum flexibility, as you do not have to purchase more than you really need. So you can tailor a solution that is optimally matched to your current requirements and budget.

Implant Module

With the Implant Module for DentalCAD, you can directly design screw-retained crowns and bridges as well as custom abutments.

Bar Module

The Bar Module allows fast and easy fabrication of standard dental bars as well as advanced complex bar designs.

Model Creator

The Model Creator helps you create physical models from intraoral scan data or impression scans.

FullDenture Module

The new FullDenture Module provides a guided workflow for designing full dentures.

PartialCAD

The PartialCAD module presents the ideal digital solution for designing model cast dentures.

Bite Splint Module

The Bite Splint Module is used for designing therapeutic bite guard splints.

Provisional Module

With the Provisional Module, you can create individualized temporary crowns and bridges.

TruSmile Module

The TruSmile Module provides realistic presentations of dental restorations.

Smile Creator

The Smile Creator is the solution for predictable esthetic smile makeovers.

Virtual Articulator

The Virtual Articulator allows you to consider dynamic articulation and occlusion when designing any restoration.

Tooth Library

The Tooth Library provides an extensive library of beautiful natural teeth.

Jaw Motion Import

The Jaw Motion Import Module allows you to import jaw movement registration data from external jaw motion measurement devices.

DICOM Viewer

The DICOM Viewer allows you to visualize voxel data during the design process.

In-CAD Nesting Module

The In-CAD Nesting Module helps you place your restorations into an appropriate milling block.

DentalCAD stand-alone software

Stand-alone licences are separate software modules intended for specific applications.

Delivery forms

	Flex StandAlone DentalDB dongle	753279
	Flex StandAlone PartialCAD	753241
	Flex StandAlone FullDenture Module	753242
	Flex StandAlone Model Creator	753243

	Flex StandAlone BiteSplint V.Articulator	753246
	Flex StandAlone Nesting	753247

Step 3: Choose your licence model

Perpetual Licence

The Perpetual Licence is a permanent licence that is valid indefinitely. With an optional upgrade contract, you can benefit from continuous improvements and ensure your software is always up to date. In addition, you can also activate add-on modules and access to DentalShare free of charge. You can cancel the upgrade contract at any time without incurring additional cost; you will, however, lose access to DentalShare (material libraries).

Flex Licence

The Flex License is a subscription-based model and offers various benefits, such as low initial cost and flexible activation and deactivation of modules. Regular upgrades are included in the price.

	Perpetual Licence without upgrade contract	Perpetual Licence with upgrade contract	Flex Licence
Upgrade included New software version including new and advanced functions, libraries, optimizations and patches	Included for 1 st year after initial activation*	✓	✓
Access to DentalShare Quick and effective multi-directional digital data exchange via the exocad software platform	Included for 1 st year after initial activation*	✓	✓
Access to exocad library portal Access to daily updated official libraries for prosthetic components and denture teeth	Included for 1 st year after initial activation*	✓	✓
Activation of add-on modules Expansion of the core version by up to 15 modules for maximum flexibility and additional indications (at additional cost)	Optional for 1 st year after initial activation*	✓	✓
Replacement of defective dongles Quick and free replacement of defective dongles	Included for 1 st year after initial activation*	✓	✓
Deactivation of modules Deactivation of modules that are no longer needed. Savings on annual upgrade fees	–	–	✓
Replacement of lost dongles Quick and free replacement of lost or stolen dongles	–	–	✓
Perpetual Licence Licence without runtime limitation	✓	✓	–

*If the upgrade contract has not been cancelled

Ivotion® Denture System

The Ivotion Denture System is now also available as part of the exocad DentalCAD software, allowing the efficient fabrication of digital dentures. Based on the FullDenture module, the Ivotion Denture add-on is required to enable the Ivotion functions and the oversize process.

In addition, the add-on also provides access to our tooth libraries that contain our popular tooth lines for tooth set-ups according to classic or lingualized occlusal schemes. Dentures can be designed efficiently by using the suggested tooth set-up and tailor individual teeth or entire groups of teeth to the specific requirements of the patient.

3Shape is another option to tailor a CAD/CAM solution matched to your lab's current size, budget and business model, and expand your offering with new services as you grow. Choose a scanner and the design software.

The LabCare package is included for the first year after purchase. From the second year on, you can choose whether to switch to the Basic version or continue with LabCare.

Step 1: Choose your 3Shape scanner

3Shape F8

The 3Shape F8 lets laboratories do more, at once. The F8 lab scanner offers high productivity, enabling dental labs to complete upper and lower jaw scans and a multitude of extended scan workflows with minimal scanner interaction. With F8 as part of a complete 3Shape solution, labs can achieve complete workflow versatility to support all digital and analog case types.

- ✓ 5-year warranty with LabCare
- ✓ 1-year warranty with Basic package
- ✓ Scan Only licence included

Features:

- ✓ Dual model scanning
- ✓ 4 cameras (5.0 megapixel)
- ✓ Multi-line blue LED
- ✓ Accuracy of 4 micron (ISO 12836)
- ✓ Texture scanning (colour texture)
- ✓ Die-in-model scanning
- ✓ Scan speed (full arch): 9 s
- ✓ Scan speed (full arch impression): 45 s

Delivery forms

3Shape E4

Multi-line blue LED technology and four high-resolution 5 MP cameras enable a die-in-model scanning strategy. Given its high scan speed, this scanner is especially suited for high-end dental labs that perform a high volume of digital restorations.

- ✓ 5-year warranty with LabCare
- ✓ 1-year warranty with Basic package
- ✓ Scan Only licence included

Features:

- ✓ 4 cameras (5.0 megapixel)
- ✓ Multi-line blue LED
- ✓ Accuracy of 4 microns (ISO 12836)
- ✓ Texture scanning (colour texture)
- ✓ Die-in-model scanning
- ✓ Scan speed (full arch): 11 s
- ✓ Scan speed (full arch impression): 45 s

3Shape E3

Two high-resolution 5 MP cameras and blue LED speckle-free technology provide extraordinary speed and highly accurate colour scanning. Perfect for large, high-volume production-orientated labs.

- ✓ 5-year warranty with LabCare
- ✓ 1-year warranty with Basic package
- ✓ Scan Only licence included

Features:

- ✓ 2 cameras (5.0 megapixel)
- ✓ Multi-line blue LED
- ✓ Accuracy of 7 microns (ISO 12836)
- ✓ Texture scanning (colour texture)
- ✓ Scan speed (full arch): 18 s
- ✓ Scan speed (full arch impression): 64 s

3Shape E2

Texture scanning and high-resolution 5 MP cameras make the E2 scanner an appropriate solution for medium-sized laboratories that demand a high level of accuracy and detail for demanding applications.

- ✓ 5-year warranty with LabCare
- ✓ 1-year warranty with Basic package
- ✓ Scan Only licence included

Features:

- ✓ 2 cameras (5.0 megapixel)
- ✓ Multi-line blue LED
- ✓ Accuracy of 10 microns (ISO 12836)
- ✓ Texture scanning (black/white)
- ✓ Scan speed (full arch): 24 s

Step 2:

Desktop Ultra PC

Highest scan performance

- Recommended for E2, E3, E4, F8
- Recommended for all software packages (ideal for implant-supported bridges and denture designs)
- 3-year warranty on PC

705799

Desktop High Performance PC

High scan performance

- Recommended for E2, E3, E4
- Recommended for all software packages
- 3-year warranty on PC

690255

Desktop Standard PC

Standard scan performance

- Recommended for E2
- Recommended for Dental System Crown & Bridge
- 3-year warranty on PC

664333

Step 3: Choose your software package

DentalSystem™ Scan Only

The easiest entry to digital technologies!
Receive TRIOS jobs or scan plaster models and send the data to an external design service provider.

Included in the purchase of a new scanner

DentalSystem™ Crown & Bridge

Design full-contour anatomies, bridges, copings, frameworks and wax-ups. Use CAD Points to design more challenging applications.

691802

DentalSystem™ Premium

This software allows you to design all applications from the Crown & Bridge package plus splints, digital temporary restorations, digital smile design, telescopes, post & core, RealView and more.

691499

DentalSystem™ Complete Restorative

Get all indications from the Premium and Removable packages plus all available restorative add-ons to design abutments, implant bars, models and more at an attractive price.

697500

DentalSystem™ Removable

For labs that specialize in providing full and partial dentures.

740500

Optional

Add-ons and CAD Points

Supplement your software solution with add-on modules to offer abutments, implant bars and bridges, models, dentures and more. Or, purchase CAD Points to use on a case by case basis for indications not included in your package.

Step 4: Choose your licence model

LabCare is included for the first year when you purchase your licence for your Dental System. Benefit from regular updates to stay up to date at all times.

From the second year on, you can choose whether to continue with LabCare or switch to the Basic package.

Please note that the licence model chosen for your Dental System will also be applied for your optional add-on software modules.

Ivotion® System library

Digital dentures are designed and customized in the 3Shape Dental System using software that guides the user intuitively through the process.

Extensive tooth libraries of our popular tooth lines with tooth set-ups according to classical and lingualized occlusal schemes are available to facilitate the process. Dentures can be designed efficiently by using the suggested tooth set-up and tailor individual teeth or entire groups of teeth to the specific requirements of the patient.

Trade-up

Our trade-up scanners offer you the chance to upgrade to state-of-the-art scanner technology for an attractive price.

The customer receives a new 3Shape lab scanner and PC and can continue to work with the existing dongle.

The 3Shape trade-up scanners are available at an attractive price, compared to a brand new scanner equipped with the Dental System Premium software.

Please contact your Ivoclar sales representative about the local availability of this trade-up offer.

Conditions:

- ✓ First, the customer is charged the price of the trade-up scanner incl. the return credit. As soon as 3Shape has received the old scanner, the return credit will be returned to the customer.
- ✓ The trade-up scanner program includes a new PC. The customer will continue to use the existing software package, service contract and the existing software modules and the licence period will remain unchanged.
- ✓ The 3Shape trade-up program applies for all 3Shape scanners.
- ✓ When ordering, please enter the serial number of the scanner and the dongle number of the existing 3Shape scanner.

Trade-in

The trade-in program applies to the exchange of a third-party system for a new 3Shape laboratory scanner system. This includes a new PC and your choice of a Dental System Premium software package.

The trade-in program applies for specified scanners from third-party manufacturers when a E2, E3, E4 or F8 scanner is purchased.

Please contact your Ivoclar sales representative about the local availability of this trade-up offer.

Scanner accessories

3Shape Dental System comes with default PCs that have been chosen to give a great scanning and design experience. For advanced users who scan and design advanced cases, an upgrade of the PC can give a significant performance enhancement. Depending on the scanner model, different options exist for upgrading the standard PC to a more powerful PC.

DentalSystem™ CAD PC

High-performance PC (without monitor), optimized for use with the 3Shape Dental System.

- ✓ High-quality graphics card
- ✓ Mouse and keyboard included (English)
- ✓ 3-year on-site service by HP

Calibration object

- ✓ For calibrating scanners

Delivery forms

Calibration object		757598
---------------------------	--	---------------

Additional scanner accessories

3Shape accessories and spare parts to optimize the use of various scanning and construction functions.

Articulator calibration object

For the transfer of the physical model position into the virtual articulator of the design software, eliminating the need for a vestibular scan.

- ✓ Easy calibration of articulators
- ✓ Suitable for use in conjunction with all transfer plates available

Delivery forms

Articulator calibration object	1 pc.	680343
--------------------------------	-------	--------

Interface plate

The interface plate serves as a holder for the putty (Blue Tack) during scanning.

- ✓ Compatible with all 3Shape scanners

Delivery forms

Interface plate	1 pc.	659308
-----------------	-------	--------

Full Denture Fixture

Holder for securing impressions. For fixation of the Gnathometer CAD, please refer to item 768083, which is available separately.

- ✓ Compatible with all 3Shape scanners

Delivery forms

Impression holder	1 pc.	697506
-------------------	-------	--------

Implant model holder

Holder for the safe mounting of implant models.

- ✓ Compatible with all 3Shape scanners

Delivery forms

Implant model holder	1 pc.	662326
----------------------	-------	--------

Wax-up model holder

Holder for the fixation of wax-ups during scanning.

- ✓ Compatible with all 3Shape scanners

Delivery forms

Wax-up model holder	1 pc.	664323
---------------------	-------	--------

Occlusion model holder

Holder for the fixation of upper and lower jaw models during scanning.

- ✓ Compatible with all 3Shape scanners

Delivery forms

Occlusion model holder	1 pc.	659272
------------------------	-------	--------

Multi-die holder

The multi-die holder is used in combination with the scan height adapter and enables up to 7 individual dies to be scanned.

- ✓ Compatible with all 3Shape scanners

Delivery forms

Multi-die holder	1 pc.	690849
------------------	-------	--------

Scan height adapter

The scan height adapter enables models to be positioned at the right height in the scanner.

Delivery forms

Scan height adapter – 1 stripe	1 pc.	690253
for D750, D850, D900L, D1000, D2000 (left axis)

Milling machines and CAM software

PrograMill® PM7

If you are looking for efficiency and performance, then the high-performance PrograMill® PM7 is the right choice for you. This machine is suitable for a versatile variety of materials and applications in wet and dry milling processes.

Equipped with a high-performance spindle, the high-power 5-axis milling machine efficiently produces restorations that are distinguished by their outstanding surface quality and excellent accuracy of fit.

Ivoclar Monitoring

Ivoclar Monitoring lets you monitor your Ivoclar lab equipment from anywhere. Receive real-time updates and push notifications from G2 devices of the PrograMill and Programat series.

* Smart, transparent and free of charge.

Available free of charge in the App store

PrograMill® PM3

High precision and consistent results are the distinguishing features of the PrograMill® PM3. This 5-axis milling machine provides great flexibility. It can process a diverse range of materials for a versatile spectrum of applications in both wet and dry operation.

The PrograMill PM3 is more than an entry-level dental mill: It offers technical sophistication, intuitive operation and high-quality results.

PrograMill® DRY

PrograMill® DRY is a compact 5-axis dry milling machine and combines coordinated processes with high-quality materials, mature technologies and comfortable handling.

Thanks to its compact design, the mill scores highly on flexibility. The machine manufactures crowns and bridges from zirconium oxide and innovative digital denture solutions from PMMA materials, such as full dentures from the Ivotion discs.

The mill also features a quick clamping system that can be operated with just one hand and without the need for additional tools, making changing materials intuitive and simple.

PrograMill® Base

The PrograMill Base combines function and esthetics. The modern base cabinet integrates a powerful and low-noise coolant system – the optimal foundation for the PrograMill milling machines PM7, PM5 and PM3. The PrograMill Suction Unit has different filter levels for filtering harmful particles. The PrograMill Tank has a capacity of 15 litres and automates the wet processing procedure. The drawer includes a specifically designed insert for accommodating materials, tools and accessories.

CAM software

The CAM software presents the interface between the design software and the milling machine and plays a crucial role. The CAM software converts design data into milling data and calculates the required milling paths. The milling strategies have a decisive influence on the quality and accuracy of fit of the restorations and can be flexibly adjusted to meet customer needs.

PrograMill CAM 2024

The software PrograMill CAM 2024, which is adapted to the PrograMill® milling machines, utilizes the entire potential of the milling machines. The software is distinguished by its very short calculation times and the 5-axis simultaneous control of the machine.

Includes all necessary licences for the PrograMill milling machines

- ✓ Milling and grinding Ivoclar materials included
- ✓ Wet processing of IPS e.max CAD included
- ✓ Open for third-party materials
- ✓ Flexible upgrade options

Block Module (part of Ivoclar Workplace)

The Ivoclar Block Module is a CAM software module specifically developed for processing Ivoclar blocks with the PrograMill PM7.

Improved grinding times for IPS e.max CAD, IPS Empress CAD and Tetric CAD result in higher productivity and, ultimately, faster patient treatment. Automatic nesting and pinning, along with fast tool path calculation, simplify and streamline the workflow. The new adaptive grinding technology ensures intelligent tool path control and enables faster processing while achieving excellent surface quality.

The block module is available via Ivoclar Workplace. All information required to install Ivoclar Workplace is available on this landing page:
<https://www.ivoclar.com/block-module>

PrograMill® material holders

Powerful holders for the PrograMill® machines PM7, PM5 and PM3 have been developed to ensure optimum processing of Ivoclar Digital CAD/CAM materials.

PrograMill® disc holder

A powerful holder has been developed for the PrograMill machines PM7, PM5 and PM3, which is distinguished by its zero-point clamping system. It ensures the optimum processing of discs with a circumferential groove of 10 mm.

The secure fit of all material discs results in high-quality milling results.

Delivery forms

PrograMill® disc holder for PM7/PM5/PM3	1 pc.	689242
---	-------	--------

Digital Denture holding

A special ring has been developed to modify the PrograMill disc holder for the digital denture process. It allows a denture to be secured in a predefined position and an already processed disc to be re-positioned accurately.

A denture, which has already been milled from the upper side, can therefore be easily removed so that the prefabricated teeth can be adhesively secured in place and then re-positioned for further processing.

Delivery forms

Digital Denture holder ring for PM7/PM5/PM3	1 pc.	689245
---	-------	--------

IPS e.matrix®

The patented multi-holder IPS e.matrix for PM7/PM5/PM3 enables up to six blocks to be milled in one grinding sequence, depending on the block size.

The IPS e.matrix for PM7/PM5/PM3 can be easily removed from the materials magazine and can be conveniently loaded outside the unit. The multi-holder is ideally adapted to the PrograMill machining strategies.

PrograMill® abutment holder for Medentika

The PrograMill® abutment holder for Medentika has been exclusively developed for the PrograMill PM7 milling machine and is suitable for a comprehensive range of implant interfaces.

The holder allows you to mill highly precise, individual abutments using titanium preforms.

Processing begins right after having inserted the holder into the milling machine. Calibration is not required.

Special geometry with a toric cutting edge, especially for titanium processing

g = grinder
Diamond-coated grinder for the wet processing of glass-ceramics

p = preform
Tools with a special coating for the processing of preform abutments

3D printer and CAM software

PrograPrint® 3D printer system

The PrograPrint PR5 is specially designed to meet the demands of dental laboratories. It is based on our extensive dental expertise, and it aims to help you fine tune your craft. The system is integrated into a validated workflow, consisting of a range of materials, software and equipment for printing, cleaning and post-curing.

PrograPrint® PR5

The PrograPrint PR5 3D printer is at the core of our 3D printing workflow. Engineered for dental applications, the machine provides absolute accuracy and intuitive operation. An innovative cartridge system ensures easy and virtually contact-free handling of the materials.

Delivery forms

PrograPrint® PR5 System	1 pc.	698703
Accessories		
PrograPrint Cartridge set for PR5	1 pc.	704372
PrograPrint Pool for PR5	1 pc.	704373
PrograPrint Stage for PR5	1 pc.	704374

PrograPrint® Cartridge

The material bottle, with the valve attached to it, is placed in the PrograPrint Cartridge. The valve automatically regulates the fill level of the material tank during the printing process. The material bottle is stored in the PrograPrint Cartridge until the next use. In this way, the material is protected from ambient light and premature curing is avoided.

Delivery forms

PrograPrint® Cartridge set for PR5	1 pc.	704372
PrograPrint Cartridge		
PrograPrint Pool		

PrograPrint® Pool

The PrograPrint Pool is the material tank for the PrograPrint PR5.

The PrograPrint PR5 uses RFID technology to monitor the material tank.

Delivery forms

PrograPrint® Pool for PR5	1 pc.	704373
---------------------------	-------	--------

PrograPrint® Pool Lid

The PrograPrint Pool Lid enables the use of Ivoclar-approved third-party printing materials. The PrograPrint Pool Lid can only be used together with a PrograPrint Pool.

Delivery forms

PrograPrint® Pool Lid	1 pc.	756691
-----------------------	-------	--------

PrograPrint® Stage

The PrograPrint Stage build platform features a robust design and offers a long service life. The non-stick coating enables the printed objects to be easily removed at the end of the printing process, while they adhere well to the surface during printing.

Delivery forms

PrograPrint® Stage for PR5	1 pc.	704374
----------------------------	-------	--------

PrograPrint® Clean

PrograPrint Clean is designed for cleaning printed 3D objects with isopropanol (IPA) to remove unpolymerized material. Printed objects can be left on the build platform when they are cleaned in the cleaning unit. The cleaner features a sturdy and durable stainless steel construction and is TÜV tested. The cleaner also features a self-reversing magnetic stirrer and a two-stage cleaning option for optimum results.

Delivery forms

PrograPrint® Clean System	1 pc.	704457
Accessories

*Various variations available

PrograPrint® CAM software

The PrograPrint CAM software offers intuitive handling and allows you to prepare the 3D printing process quickly and efficiently.

It is seamlessly integrated in the workflow of the PrograPrint system, and it is fully coordinated with the PrograPrint PR5 3D printer and ProArt Print materials.

The software has been independently developed by Ivoclar with the purpose to ensure that the different software components are configured properly.

It efficiently creates support structures and effectively nests all ProArt Print materials. On request we will manage your materials and build styles for you, so that you will always be up to date.

Delivery forms

PrograPrint® CAM Software	1 pc.	754530
---------------------------	-------	--------

ProArt Print

ProArt Print, the light-cured resin for stereolithography 3D printing, is used to produce precise, dimensionally stable printing objects with the PrograPrint PR5 3D printer and approved third-party systems. The printing materials are an integral part of the PrograPrint system. ProArt Print is easy to work with without contact with the material thanks to the special cartridge system.

ProArt Print Wax

ProArt Print Wax features excellent burnout properties and is therefore the ideal auxiliary material for the fabrication of press restorations.

It is particularly suitable for the 3D printing of inlays, onlays, crowns and bridges.

In combination with the press technique, ProArt Print Wax enables the fabrication of monochromatic and polychromatic restorations as well as implant restorations with high accuracy of fit and surface quality.

Delivery forms

ProArt Print Wax yellow	1000 ml	696296
-------------------------	---------	--------

ProArt Print Model New Formula

ProArt Print Model New Formula is an opaque beige material and is suitable for the production of models. Implant models, models for the fabrication of vacuum-formed splints and models with removable dies can be fabricated.

ProArt Print Model produces models that feature excellent dimensional stability. Their high precision results in accurately fitting final restorations.

Customer Care

Faster Solutions

With multiple ways to connect with us, you can get the help you need quickly. Innovative tools like the instant video assistant enable real time dialog and troubleshooting through a safe and secure channel.

Expert Care

Direct contact with local and global support specialists who know the products best ensures you receive the quality service you expect. Trained and certified service technicians are standing by for all your technical needs.

On-site Assistance

From secure delivery and installation, to on-site maintenance and repair, our Customer Care field representatives will get you up and running.

Investment Protection

Tailored service packages are available to protect your equipment and offer peace of mind. Save time, reduce potential urgent repair costs, and never miss your deadlines.

Continued Confidence

Routine service and maintenance support through Customer Care can help identify and fix any potential issues with your equipment before it leads to an interruption of your work.

Regular service and maintenance is essential for any piece of equipment to ensure it continues to operate reliably, safely, and effectively.

All-round Protection for your Investment

Take the guess work out of your service and maintenance needs with routine support from our experts. On-site and remote assistance ensures optimal equipment performance.

Get Expert Support

Enjoy peace of mind with premium technical support for your investment every step of the way. Our trusted, certified service specialists know your equipment inside and out. You are in safe hands..

Minimize Machine Downtime

Annual maintenance allows us to identify and fix any potential issues with your equipment before it leads to an interruption of your work. Save time, reduce potential urgent repair costs, and never miss your deadlines.

Quality Assurance

Equipment parts may need replacement due to wear and tear from regular usage. With the extended warranty option in our service packages, you enjoy peace of mind knowing you are covered. Additionally, all replacement parts come with a promise of consistent quality and are tailored to your individual milling systems.

Service Packages Overview

PrograMill® PM7, PM5, PM3 and DRY

Basic Package

This package with unlimited renewal offers a small discount on wear parts and is ideal for your basic maintenance needs.

Advanced Package

This package with extended warranty coverage offers discounted wear parts and provides the ideal value for money on maintenance and repairs.

Premium Package

This package with extended warranty coverage offers complete wear part protection and is ideal for those looking for maximum insurance on all maintenance and repairs.
